

Physical Rehabilitation Science, PhD

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations. They should have a cumulative grade-point average of at least 3.00 and scores at or above the 50th percentile for each section of the Graduate Record Exam (GRE) General Test. A minimum of two years of clinical experience may be considered highly desirable, depending on the research interest area.

Application materials must include a complete Graduate College application form, test scores, transcripts, three letters of recommendation, and a statement of purpose.

Personal interviews are required of all applicants selected for consideration by the admissions committee. On-campus interviews are preferred, but telephone interviews may be substituted when necessary. Approximately 20 students are enrolled in the PhD program each year.
