Molecular Medicine Courses (MMED)

This is a list of all accounting courses. For more information, see Molecular Medicine.

**MMED:5270 Pathogenesis of Major Human Diseases**
- 3 s.h.
- Critical analysis of pathogenesis models in a series of major human diseases; clinical presentation, analysis of cellular and molecular events leading to the disease, discussion of key papers. Offered spring semesters of even years. Same as IGPI:5270, PATH:5270.

**MMED:6215 Transcription and Multifunctional Regulation by RNA**
- 1 s.h.
- Principles and techniques for investigating mechanisms of controlling eukaryotic gene expression; basic genome organization, chromatin structure, transcription, RNA processing, translation; cloning methods, use of electronic sequence databases, footprinting, chromatin immunoprecipitation, in vivo and in vitro transcription assays, DNA microarray analysis, information retrieval. Prerequisites: BMED:5207.

**MMED:6220 Mechanisms of Cellular Organization**
- 3 s.h.
- Current understanding of basic cell biological processes; key experiments that led to guiding insights; mechanisms that cells use for compartmentalization and how those mechanisms are regulated; biogenesis of major organelles (e.g., mitochondria, peroxisomes, nucleus, secretory/endocytic membrane system); functions of cytoskeleton in cell motility, organelle motility, and cell division. Prerequisites: BIOC:3130. Same as ACB:6220, MPB:6220.

**MMED:6225 Growth Factor Receptor Signaling**
- 1 s.h.
- Mechanisms of signaling by growth factors; cytokines and related molecules that regulate cell proliferation, development, differentiation, and survival; emphasis on molecular mechanisms of signaling, relevance of these signaling processes to various human diseases. Same as ACB:6225, MPB:6225.

**MMED:6226 Cell Cycle Control**
- 1 s.h.
- Cell cycle regulation, DNA damage-dependent cell cycle regulation, redox-dependent cell cycle regulation, cellular senescence. Same as ACB:6226, MPB:6226.

**MMED:6227 Cell Fate Decisions**
- 1 s.h.
- Cellular fate decisions including signal integration, terminal differentiation in development, mechanisms of embryonic stem cell gene regulation/cellular reprogramming, cell death paradigms, and cell death in development and cancer. Same as ACB:6227, MPB:6227.

**MMED:6240 Inflammatory Cell Signaling and Targeted Cancer Therapy**
- 1 s.h.
- Introduction to topics in important cancer signaling pathways; promises and challenges of targeted cancer therapy; emphasis on current fundamental topics in cancer cell signalings; how altered protein ubiquitination/deubiquitination, constitutive activation of proteins kinases, and transcription factors underpin uncontrollable proliferation and survival of cancer cells in tumor microenvironment; translation of knowledge to targeted cancer therapy; promotion of critical thinking. Recommendations: MMED:6225, MMED:6227, and BIOC:5243.

**MMED:6250 Mechanisms of Parasitism Journal Club**
- 1 s.h.
- Reviews of recent publications in molecular parasitology research and thesis research by training grant or journal club students. Same as MICR:6250.

**MMED:6280 Critical Thinking in Molecular Medicine**
- 1 s.h.
- Opportunity to work closely with participating faculty to gain skill in critical reading of research literature and facility in presenting material to an audience. Requirements: advanced graduate standing.

**MMED:7290 Seminars in Molecular Medicine**
- 1 s.h.

**MMED:7305 Molecular Medicine Research**
- arr.
- Requirements: molecular and cellular biology graduate standing.

**MMED:8115 Molecular Physiology**
- 3 s.h.
- Principles of human physiology, organ systems, cell function. Offered fall semesters.
