Molecular Physiology and Biophysics Courses (MPB)

This is a list of all molecular physiology and biophysics courses. For more information, see Molecular Physiology and Biophysics.

**MPB:4199 Research, Independent Study**  
Recommendations: closed to molecular physiology and biophysics graduate students.

**MPB:5153 Graduate Physiology**  
Principles of human physiology, organ systems, cell function. Offered fall semesters. Requirements: grades of C- or higher in BIOL:1411 and CHEM:2210 and CHEM:2220, and graduate standing.

**MPB:5200 Medical Physiology Online**  
Fundamental principles of cellular membranes, muscle, sensory organs, motor neurological systems, autonomic nervous systems, cardiovascular, pulmonary, renal, gastrointestinal, endocrine, and reproductive systems; interdependence of organ systems to maintain a normal physiological state using clinical correlates as applied to humans; basic physiological principles that establish a solid foundation for future pathophysiological and pharmacological concepts. Recommendations: medical, dental, physician assistant, nurse anesthesia, physical therapy, or graduate standing.

**MPB:5211 Biophysics of Excitable Membranes**  
Selected electrophysiological and biophysical topics from published research. Prerequisites: HHP:3500.

**MPB:6225 Growth Factor Receptor Signaling**  
Mechanisms of signaling by growth factors; cytokines and related molecules that regulate cell proliferation, development, differentiation, and survival; emphasis on molecular mechanisms of signaling, relevance of these signaling processes to various human diseases. Same as ACB:6225, MMED:6225.

**MPB:6226 Cell Cycle Control**  
Cell cycle regulation, DNA damage-dependent cell cycle regulation, redox-dependent cell cycle regulation, cellular senescence. Same as ACB:6226, MMED:6226.

**MPB:6227 Cell Fate Decisions**  
Cellular fate decisions including signal integration, terminal differentiation in development, mechanisms of embryonic stem cell gene regulation/cellular reprogramming, cell death paradigms, and cell death in development and cancer. Same as ACB:6227, MMED:6227.

**MPB:6265 Neuroscience Seminar**  

**MPB:8115 Human Physiology for Dental Students**  
Principles of human physiology, organ systems, cell function. Offered fall semesters. Requirements: grades of C- or higher in BIOL:1411, CHEM:2210, and CHEM:2220; and D.D.S. enrollment.
