Breast Imaging Program Courses (RSBI)

This is a list of all breast imaging program courses. For more information, see Radiation Sciences.

**RSBI:3310 Patient Care for Breast Imaging** 3 s.h.
Foundation for providing high quality patient care during breast imaging exams and procedures; patient communication, patient assessment and treatment options including surgical and nonsurgical and reconstruction.
Requirements: radiation sciences major.

**RSBI:3315 Breast Imaging Clinical Internship I** 2 s.h.
Breast imaging clinical internship practicum at UI Health Care; rotation through department imaging rooms; competency and objective-based education with required clinical performance evaluations; participation in routine and advanced breast imaging exams; performance expectations become progressively higher as students gain experience and skills.
Requirements: radiation sciences major.

**RSBI:4110 Breast Imaging Procedures and Analysis** 3 s.h.
Breast imaging exams including technique, image evaluation, and positioning.

**RSBI:4115 Breast Imaging Clinical Internship II** 4 s.h.
Breast imaging clinical internship scheduled at University of Iowa Hospital & Clinics; rotation through department imaging rooms; competency and objective-based education with required clinical performance evaluations; experience facilitated by breast imaging technologists, radiologists, residents, and clinical coordinator; participation in routine and advanced breast imaging exams; performance expectations become progressively higher as students gain experience and skills.
Prerequisites: RSBI:3315. Requirements: radiation sciences major.

**RSBI:4210 Anatomy and Pathology for Breast Imaging** 2 s.h.
Anatomy, localization terminology, histology, and cytology; pathology including mammographic appearance and reporting terminology; benign, high risk, and malignant conditions and their mammographic appearances.

**RSBI:4215 Breast Imaging Clinical Internship III** 4 s.h.
Breast imaging clinical internship schedules at University of Iowa Hospital & Clinics; rotation through department imaging rooms; competency and objective-based education with required clinical performance evaluations; experience facilitated by breast imaging technologists, radiologists, residents, and clinical coordinator; participation in routine and advanced breast imaging exams; performance expectations become progressively higher as students gain experience and skills.

**RSBI:4220 Quality Control in Breast Imaging** 3 s.h.
Quality control aspects related to breast imaging; quality assurance and evaluation including accreditation, certification, and Mammography Quality Standards Act (MQSA) regulations; quality control including mammographers tests and digital quality control tests; medical physicist test including general quality control tests and quality control tests specific to digital imaging and tomosynthesis.

**RSBI:4225 Breast Imaging Advanced Procedures and Analysis** 3 s.h.
Advanced breast imaging modalities including breast sonography, breast MRI, sentinel node mapping, and interventional procedures.
