College of Education

Dean
• Daniel L. Clay

Associate Dean, Academic Affairs and Graduate Programs
• Amanda H. Thein

Associate Dean, Teacher Education and Student Services
• Nancy J. Langguth

Undergraduate major: B.A.
Undergraduate minors: educational psychology; human relations
Graduate degrees: M.A.; M.A.T.; M.S.; Ed.S.; Ph.D.
Graduate certificate: online teaching
Website: https://education.uiowa.edu/

The nation's first university-level professorial chair in education was established at the University of Iowa in 1872. The department became the School of Education in 1907; and the College of Education, structured largely as it is today, was founded in 1913. Since then, the college's growth has mirrored the growth of the University.

Over the years, College of Education faculty members have been leaders in a variety of educational fields. Particularly noteworthy have been their contributions in the fields of educational testing and measurement. These contributions helped lay the foundation for today's testing and measurement industry, making Iowa City one of the best-known centers for this educational specialty.

The college has four departments—the Departments of Educational Policy and Leadership Studies, Psychological and Quantitative Foundations, Rehabilitation and Counselor Education, and Teaching and Learning.

Extramural Education

Through Distance and Online Education, selected College of Education courses are offered at off-campus sites and hours outside the traditional schedule. If taken after formal admission to a specific program, some of these courses may be applied to meet requirements for degrees. Students who plan to complete a degree program should apply for admission to the Graduate College and satisfy all application requirements for the degree program they wish to enter.

Special regulations govern such course work. Students should obtain prior approval from their program advisor before registering in extramural courses. Students not regularly admitted to the University of Iowa also may register in extramural courses, but credit earned before admission does not count toward residency requirements.

Honors in Education

The College of Education Honors Opportunity Program is open to sophomores, juniors, and seniors who have maintained a g.p.a. of at least 3.50. Students with lower grade-point averages who have demonstrated research potential also may be accepted, based on the recommendations of faculty and/or staff members and the education honors advisor. Honors Opportunity Program students must take EHOP:4100 Honors Seminar in Education, EHOP:4101 Senior Honors Project, and complete five additional honors experiences. Successful completion of the program results in recognition of the student as a College of Education honors graduate.

Faculty

All tenure-track faculty members hold earned doctorates in their teaching fields, and many have had teaching or administrative experience in the public schools. Several hold joint appointments in the College of Liberal Arts and Sciences.

Programs

Undergraduate Programs of Study

Majors

The College of Education offers undergraduate majors in art education, elementary education, English education, foreign language education, mathematics education, music education, science education, and social studies education for students earning a Bachelor of Arts degree. See the Department of Teaching and Learning in the Catalog for details about the majors.

Students pursuing any of the undergraduate majors complete a Teacher Education Program (TEP) approved by the State of Iowa through the College of Education. See TEP/Licensure [p. 3] in this section of the Catalog.

Minors

The College of Education offers two undergraduate minors for students who wish to be better informed about education and related fields: one in educational psychology and one in human relations, offering students an overview of various educational areas beyond, but supportive of, traditional education programs. The minors may help support students' future career objectives and benefit students in their roles as parents, taxpayers, or future members of local boards of education. View the minor in educational psychology (Department of Psychological and Quantitative Foundations) and the minor in human relations (Department of Rehabilitation and Counselor Education) in the Catalog to learn more.

Graduate Programs of Study

Graduate study in the College of Education is guided by the policies of the Graduate College, with additional requirements set by the College of Education's faculty. Graduate students in education enroll in the Graduate College and receive their degrees from that college. See the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Degree Programs Offered

The College of Education offers the following graduate degrees and programs.

Department of Educational Policy and Leadership Studies

M.A., Ed.S., and Ph.D. in educational policy and leadership studies; the following programs are available:

• Educational leadership (offered in the M.A., Ed.S., and Ph.D.)
• Higher education and student affairs (offered in the M.A., Ed.S., and Ph.D.)
• School curriculum and assessment policy (offered in the Ed.S.)
• Schools, culture, and society (offered in the M.A. and Ph.D.)

Department of Psychological and Quantitative Foundations
M.A., Ed.S., and Ph.D. in psychological and quantitative foundations; the following programs are available:
• Counseling psychology (offered in the M.A.—Hong Kong and Ph.D.)
• Couple and family therapy (offered in the Ph.D.)
• Educational measurement and statistics (offered in the M.A. and Ph.D.)
• Educational psychology (offered in the Ph.D.)
• Learning sciences (offered in the M.A.)
• School psychology (offered in the Ed.S. and Ph.D.)

Department of Rehabilitation and Counselor Education
M.A. and Ph.D. in rehabilitation and counselor education; the following programs are available:
• Clinical mental health counseling (offered in the M.A.)
• Counselor education and supervision (offered in the Ph.D.)
• Rehabilitation counseling program (offered in the M.A.)
• School counseling (offered in the M.A.)

Department of Teaching and Learning
M.A., M.A.T., M.S., and Ph.D. in teaching and learning; the following programs are available:
• Art education (offered in the M.A.)
• Developmental reading (offered in the M.A.)
• English education (offered in the M.A. and M.A.T.)
• Foreign language and English as a Second Language (ESL) Education (offered in the M.A., M.A.T., and Ph.D.)
• Language, literacy, and culture (offered in the Ph.D.)
• Mathematics education (offered in the M.A., M.A.T., and Ph.D.)
• Science education (offered in the M.S., M.A.T., and Ph.D.)
• Social studies education (offered in the M.A., M.A.T., and Ph.D.)
• Special education (offered in the M.A. and Ph.D.)
• STEM education (offered in the M.S.)
• Teaching, leadership and cultural competency (offered in the M.A.)

Master of Arts
The College of Education offers a Master of Arts. Some of the college's M.A. programs are offered with thesis as well as without thesis. Nonthesis programs usually provide more specialized course work than do thesis programs. Although a nontesis program is not necessarily terminal, students who expect to continue their studies in a doctoral program are urged to select a thesis program in order to gain more experience in research procedures. Students who complete a nontesis M.A. and are admitted to a Ph.D. program may be asked to submit evidence of writing and research skills to their advisor or department during the early part of their doctoral program. For information about programs that offer a thesis option, see the program descriptions under “Graduate Programs of Study” in College of Education department sections of the Catalog.

Course work completed more than 10 years before the session in which the degree is to be conferred must be evaluated to determine how much credit may be accepted toward the degree requirements. Students must earn at least 24 s.h. in University of Iowa courses after formal admission to a master's degree.

Master of Arts in Teaching
The M.A.T. program is designed for academically superior liberal arts and sciences graduates who completed few or no professional education courses in their undergraduate programs. It is a nontesis program with requirements that range from 45 s.h. to 67 s.h. of credit. See the M.A.T. in teaching and learning in the Catalog.

The program leads to a master's degree and licensure as a secondary teacher in the fields of English, foreign languages, mathematics, science education, and social studies education. Admission to the program requires a g.p.a. of at least 3.00 in undergraduate course work. The program includes 18 s.h. of graduate course work in the student's teaching field. Students must complete a minimum of 20 s.h. of graduate work in education to satisfy licensure requirements.

Combined B.A./M.A.T. (Science Education Subprogram)
Bachelor of Arts students interested in pursuing a graduate degree in teaching may apply to the combined Bachelor of Arts/Master of Arts in Teaching with a science education subprogram offered by the College of Liberal Arts and Sciences and the College of Education. Designed for undergraduate students majoring in biology, chemistry, environmental sciences, mathematics, or physics, the combined program enables students to earn a B.A. and M.A.T. in five years by beginning to earn graduate credit during their fourth year of undergraduate study and by counting up to 18 s.h. of qualifying credit toward both degrees. For more information, see "Combined B.A./M.A.T." under Science Education in the Master of Arts in Teaching, M.A.T. section of the Catalog. Interested students should consult an advisor.

Master of Science
The College of Education offers a Master of Science in teaching and learning with a science education subprogram (without thesis). The degree requirements are similar to those for a Master of Arts. It also offers the Master of Science in teaching and learning with a STEM education subprogram (with thesis).

Specialist in Education
The Ed.S. is granted upon completion of a prescribed two-year postbaccalaureate program designed for students preparing for professional work in fields such as administration and supervision, and special services. Of the minimum 60 s.h. required for the degree, 28 s.h. must be in the specialization area; the rest may be earned in cognate fields, supervised experience, research, and elective courses. The research must culminate in a written report.

Other requirements for the Ed.S. are the same as for the master's degree, except that an Ed.S. requires students to complete 30 s.h. of resident work on campus after admission to the program. Course work completed 10 years before the
final examination must be evaluated to determine the amount of credit that may be accepted toward program requirements. Not all programs offer an Ed.S. degree. For a list of programs and degrees offered, see "Graduate Programs of Study" above.

**Doctor of Philosophy**

The Ph.D. is the most advanced academic degree. It is conferred upon students who have demonstrated superior scholarship and mastery of research skills in course work as well as in the preparation and defense of a dissertation. Ph.D. students must complete at least 39 s.h. while registered in the University of Iowa Graduate College and after formal program admission.

**Certificates**

The Certificate in College Teaching requires 12 s.h. of graduate credit. The certificate program is open to all University of Iowa students working toward a Ph.D. or other terminal graduate degree. The certificate program complements discipline-oriented graduate programs and prepares students for careers in postsecondary education. It requires course work, supervised teaching experience, and preparation of a teaching portfolio. To learn more or to apply, see the Certificate in College Teaching (Graduate College) in the Catalog.

The Certificate in Online Teaching requires 12 s.h. of graduate credit and is offered completely online. The certificate program is open to students enrolled in University of Iowa graduate degree programs and to individuals who are enrolled in the Graduate College as nondegree students. The certificate program develops students’ skills in using technology to solve instructional problems associated with distance and time. The certificate’s online format uses the techniques and approaches that the program teaches. To learn more or apply, see the Certificate in Online Teaching in the Catalog.

**Professional Improvement**

Students who are interested in taking courses as nondegree students should apply for nondegree status to the Graduate College. They can then be admitted by a department on a nondegree basis by contacting the department. Students must be admitted to a department in order to complete a program objective such as teacher licensure.

**TEP/Licensure**

Teacher Education Programs (TEP) and Student Teaching

The College of Education offers teacher preparation programs in elementary education and in secondary education for students earning bachelor’s degrees. It offers majors in art education, elementary education, English education, foreign language education, mathematics education, music education, science education, and social studies education. The college also provides a number of specialized elementary and secondary teaching endorsement programs.

Graduate and postbaccalaureate students also may complete a TEP; see “Graduate and Postbaccalaureate Admission to TEPs” below and the Department of Teaching and Learning section of the Catalog.

Preparation for special education teaching is offered primarily at the graduate level. In addition, an instructional strategist program is available as an added endorsement for undergraduate students admitted to an elementary education program.

The College of Education awards Bachelor of Arts undergraduate majors to K-12 teaching, elementary education, and seven other majors. These majors—art education, English education, foreign language education, mathematics education, music education, science education, and social studies education require a corequisite content major from the College of Liberal Arts and Sciences. See the Department of Teaching and Learning section of the Catalog for details about these majors. The majors require admission to the TEP.

The Office of Student Services provides information on TEPs; offers assistance with admission, student field experiences, and teacher licensure/certification; and serves as a liaison with other University units and external agencies. For more information, visit the office’s website.

**Undergraduate Admission to TEPs**

Undergraduate applicants to the University of Iowa who wish to become teachers may indicate their interest in the elementary education major or a secondary-level Teacher Education Program on their application for admission. Application materials for TEPs are available on the office’s website and are filed through the web application, Tk20 (Watermark).

Acceptance to a TEP is prerequisite to registration for most College of Education undergraduate courses.

**Application Deadlines**

Students must be admitted to the TEP in order to register for certain courses, to participate in field experiences/practicums, and to student teach. The priority admission deadline for fall semester is March 1, with applications accepted on a rolling basis until May 1. The priority admission deadline for spring semester is October 1, with applications accepted on a rolling basis until December 1. The ideal time to apply is by the priority deadline, so that students who are admitted to the program can be cleared for advising and registration in a timely manner. Applications are only considered by the faculty when all requirements (including test score minimums) are complete. Faculty members in each program area review and select applicants to be admitted to their program. Some program areas may reach capacity for acceptance before the final deadlines. Applicants are notified of admission decisions by email following faculty review.

**General Requirements**

Admission to TEPs is selective. Admission requirements may vary by program area. In order to be considered for admission to a TEP, an undergraduate student must satisfy the following requirements: admission to the University of Iowa; a minimum amount of credit for college-level work; minimum scores on a predemissions test; and a predemissions volunteer field experience in a regular K-12 classroom setting. There may be additional requirements. TEP application materials and current minimum application requirements are available on the Office of Student Services website.

TEP admission is based on a faculty review of all application components. Meeting the minimum criteria does not ensure program admission. Selection is determined by academic achievement as reflected in grade-point average and test
scores, aptitude as reflected by recommendations and personal statements, and the ability of the given program area to provide quality instruction and clinical and field experiences.

**Direct Admissions Policy**

The College of Education offers direct admission into the elementary TEP. First-year students who present an American College Test (ACT) composite score of 27 or higher and a final high school g.p.a. of at least 3.80 are eligible for the direct admission track into the elementary TEP. Students in this track must submit qualifying Praxis Core Academic Skills for Educators Tests (Core) scores and a qualifying 10-hour preadmission school field experience verification form by a selected deadline within their first year at the University of Iowa in order to validate the admission. The faculty and administration of the elementary TEP reserve the right to cap enrollment in the direct admission track.

The College of Education also offers direct admission into the music TEP. First-year students who, upon graduation from high school, have a high school g.p.a. of 3.00 or higher and have been accepted into a music studio will be directly admitted into the K-12 music TEP. This admission is conditional until the minimum admission requirements are complete. The requirements include admission to the School of Music, completion of an essay in 500 words or less on why the applicant wishes to be a music teacher, completion of the 10-hour preadmission school field experience verification form, and completion of the Praxis Core with qualifying scores.

**Graduate and Postbaccalaureate Admission to TEPs**

Students who have completed a baccalaureate degree may be admitted to a TEP as graduate or undergraduate students. Students must apply to the TEP and to the Graduate College or the College of Liberal Arts and Sciences. In some programs they may apply for a master’s degree objective—either a Master of Arts in Teaching (M.A.T.) or in selected majors, a Master of Arts (M.A.).

Students who choose to pursue a graduate-level TEP must be eligible for admission to the Graduate College, which requires a g.p.a. of at least 3.00 in all previous college coursework. They must submit an official Graduate Record Exam (GRE) General Test score report, with scores that meet the minimum score requirement. They also must submit a complete application to the TEP; see the Graduate Admissions website.

Students also may apply to the College of Liberal Arts and Sciences as postbaccalaureate students with senior standing. Students who choose this option must apply to the appropriate TEP, following the undergraduate admissions procedure, and must meet the general requirements for undergraduate admission to the University of Iowa; see the Undergraduate Admissions website.

Priority application deadlines for graduate students and postbaccalaureate students with senior standing are March 1 and October 1.

**TEP Standards and Policies**

Students in the TEP must meet grade-point average requirements each semester. Students who do not meet the requirements are placed on probation; those who fail to meet the requirements in a successive semester may be removed from the TEP or denied admission to student teaching. For more information on standards and policies, consult the Office of Student Services.

**InTASC Standards-Based Assessments**

Once admitted to the TEP, teacher candidates’ progress toward meeting professional standards is documented on TK20 (Watermark), a web-based assessment system. Students apply to the TEP through the system, and throughout the program submit assignments designated by their respective program area for standards-based scoring on rubrics in common across all program areas.

**Teacher Leader Professional Development Program**

Teachers from the University of Iowa are distinguished by their preparation with world-class faculty researchers and clinical practitioners and a one-of-a-kind professional development program that highlights contemporary issues in 21st-century education. All requirements must be completed prior to student teaching. All teacher education students are required to participate.

**Student Teaching**

The final phase of the TEP is the professional semester, devoted to supervised student teaching and directed observation in a variety of situations. The student teaching semester is a full-time, all-day, experience. Faculty members, professional staff, and advanced graduate students who are experienced teachers serve as supervisors.

Periodic seminars provide for discussion and evaluation of student teachers’ experiences. Transfer credit may not be used to satisfy the student teaching requirement.

To be admitted to the student teaching semester, students must submit a separate application to the Office of Student Services in the College of Education. All course work in education, for the major, and for the degree must be completed before the student teaching semester. Applications are submitted during the calendar year before the student teaching semester. The deadline is November 15 for students planning to student teach the following fall semester and April 15 for students planning to student teach the following spring semester.

Admission to student teaching requires program area faculty approval as well as verification of satisfactory progress in meeting both College of Education professionalism standards and program area standards, which are set at the time of admission to the TEP. In some programs, standards are higher than the college’s required g.p.a. of at least 2.70. Students should consult with their advisors regarding specific requirements for the program areas.

For more information, contact the Office of Student Services.

**Waivers**

Students who have completed courses that they wish to substitute for program requirements should consult with their advisors.

**Urban Student Teaching**

Students who want to advance their educational interests through student teaching in an urban setting may apply through the Office of Student Field Experiences. The urban districts include Chicago Public Schools; Aldine, Texas (Houston area); and Rialto, California (Los Angeles area). These options are open to all education majors who meet the
requirements established for these student teaching sites. For more information about this and other programs, contact the Office of Student Services.

**International Student Teaching**

International student teaching experiences are available primarily through Global Gateway for Teachers, an Indiana University Program working in collaboration with the University of Iowa. Sites include Australia, China, Costa Rica, Ecuador, England and Wales, Greece, India, Ireland, Italy, Japan, New Zealand, Norway, Russian Federation, Scotland, Spain, and Tanzania.

Interested students must meet the regular requirements for student teaching and must have the approval of their advisor and the appropriate program coordinator. In most locations, students are assisted with housing by the on-site coordinator.

International assignments are for eight weeks. Students complete an eight-week assignment in a stateside placement followed by an eight-week assignment in an international placement. Secondary education students in some program areas (for instance, English education) are required to complete a full semester of student teaching in the United States before student teaching at an international site.

For more information about international student teaching opportunities, contact the Office of Student Services.

**Program Completion Assessment**

As a requirement for completion of an approved TEP for initial teaching licensure, the state of Iowa requires a program completion assessment. University of Iowa student teachers must pass the edTPA assessment of their program as a requirement for program completion.

**Course Substitutions**

Students who have completed courses that they wish to substitute for program requirements should consult with their advisors.

All University of Iowa students seeking an Iowa teaching license must complete EPLS:4180 Human Relations for the Classroom Teacher and EDTL:4900 Foundations of Special Education, or approved substitutes. Human relations courses offered through community colleges are not accepted.

**Teacher Licensure/Certification**

The Iowa Board of Educational Examiners issues teacher, support service, and administrator licenses on the recommendation of Iowa colleges and universities whose programs have been approved by the Iowa Department of Education. All University of Iowa preparation programs have Iowa Department of Education approval.

Licensure/certification requirements across the nation are subject to change. Students who plan to seek employment in a state other than Iowa should make every effort to be informed about current requirements in that state. Generally, students who apply out-of-state should first secure Iowa licensure.

To be recommended by the University of Iowa, applicants must complete all requirements of the appropriate approved program. A minimum of 20 s.h. of course work applied to meet program requirements must be earned at the University of Iowa.

In the State of Iowa, applicants must be at least 21 years old to be granted a teaching license. The Iowa Board of Educational Examiners requires a national criminal history background check, an Iowa Division of Criminal Investigation background check, and registries and records checks for all new applicants for Iowa licensure. Disqualifying criminal convictions and founded child abuse are set out Iowa Code 272.2 and Iowa Administrative Code 282-11.35, and in the Iowa Board of Educational Examiners Ethics Brochure.

The College of Education Office of Student Services provides Iowa application forms, fingerprinting procedures, and licensure/certification assistance to all students completing approved programs offered by the college. It also provides assistance to individuals interested in adding endorsements to their Iowa license based on completion of State of Iowa minimum licensure requirements.

---

**Resources**

**Baker Teacher Leader Center**

The Baker Teacher Leader Center (Baker TLC) is a teacher professional development center designed for pre- and in-service teachers. The Baker TLC manages the teacher leader certificate, a value-added, preservice, professional development certificate that delivers additional opportunities for students to learn about, and engage with a variety of education related topics, practices, and theories. The goal of the certificate is to enable students in the Teacher Education Program (TEP) to better innovate, improve, develop, and discover their identity as emerging teacher leaders.

The Baker TLC operates a teacher licensure renewal credit program, offering relevant research and evidence-based professional development to practicing teachers on topics that are most important to Iowa’s schools and students. Professional development offered through the Baker TLC is aligned with the needs identified by the Teacher Education Advisory through survey responses received from school administrators, policy leaders, and faculty, and from information and data received from professional education organizations such as the Iowa Association of Colleges for Teacher Education (IACTE), the American Association of Colleges for Teacher Education (AACTE), and community partners.

**Belin-Blank Center for Gifted Education and Talent Development**

Located in the Blank Honors Center, the Connie Belin and Jacqueline N. Blank International Center for Gifted Education and Talent Development conducts research, training, and service in gifted education and disseminates information on the education of gifted students. Professional development opportunities include the Belin-Blank Fellowship Program in Gifted Education, practicum and internship experiences, and course work in gifted education (including course work for the State of Iowa Talented and Gifted Endorsement).

Precollege student programs include Invent Iowa, Scholastic Art & Writing Awards, above-level testing for students in grades 3-9, precollege summer and academic year programs for high-ability students in grades 2-11, and the Iowa Online Advanced Placement Academy.

Other services include the Wallace Assessment and Counseling Clinic, which specializes in twice-exceptionality; and the Acceleration Institute, which is dedicated to the study of curricular acceleration for academically talented children. The center also administers the Bucksbaum Early...
Entrance STEAM Academy, a highly selective early-entrance program for students who have completed their sophomore or junior year in high school and are ready to enroll as full-time University of Iowa Honors students.

For more information, contact the Belin-Blank Center.

Blommers Measurement Resources Library

The Paul Blommers Measurement Resources Library includes books, journals, research reports, and reference materials related to educational and psychological measurement, testing, assessment, and evaluation, as well as an extensive collection of published and unpublished tests. The library supports the teaching and research needs of faculty, staff, and students at the University of Iowa, primarily serving the College of Education.

Center for Advanced Studies in Measurement and Assessment

The Center for Advanced Studies in Measurement and Assessment (CASMA) pursues interdisciplinary research-based initiatives that lead to advances in the methods and practice of educational measurement and assessment. CASMA performs, promotes, fosters, and disseminates research in measurement and psychometric methodologies that respond to contemporary needs and initiatives in testing.

Currently, the center devotes considerable resources to research on equating, scaling, and generalizability theory; it also offers workshops and training sessions on those topics. Extensive free suites of computer programs are available on the CASMA website. The site also features research reports and technical notes on measurement topics such as generalizability theory, equating methods, and linking with item response theory.

Center for Evaluation and Assessment

The Center for Evaluation and Assessment (CEA) provides third-party program evaluation, assessment, and other research services to a broad range of clients working in multiple programmatic areas. The center's mission is to provide high quality program evaluation and research services to support data-driven decision-making, to train graduate students, and to advance evaluation theory and practice.

Center for Research on Undergraduate Education

The Center for Research on Undergraduate Education (CRUE) is dedicated to the study of undergraduate education in America, from how academic and social experiences affect students to the methods schools use to improve students' chances for success in the classroom and beyond graduation. CRUE brings a methodologically balanced approach to the study of undergraduate education.

College of Education Writing Resource

The Writing Resource provides academic writing support for graduate students at the College of Education. Students sign up to work collaboratively with a writing tutor throughout the composing processes—from conceptualizing ideas to polishing and publishing/finalizing the paper. The mission is to facilitate each student's individual growth as a writer and to foster a collaborative writing community. Services are free to graduate students in the College of Education.

Cooperating Schools Program

The Cooperating Schools Program (CSP) is a University-wide service that facilitates placement of research projects and service-learning projects conducted by faculty, staff, and students in public schools throughout Iowa. The program provides information to help researchers obtain permission to conduct research in Iowa schools. The Cooperating Schools Program was instituted at the request of school administrators charged with the responsibility of approving research projects in their schools.

Education Technology Center

The Education Technology Center (ETC) provides computer services to College of Education faculty, staff, and students. In addition to internet access, services include collegiate file and application servers; standard office tools; specialized applications such as media production tools and qualitative and quantitative analysis programs; secure folders and directories; and electronic mailing lists for faculty, staff, and student groups. The ETC also provides website and digital signage (kiosk) development for College of Education departments, offices, and groups.

The Education Technology Center provides faculty with technical and design support for courses, research technologies, distance education, multimedia, and ePortfolio production.

SMART Boards and SMART Podiums, and wireless access are available throughout the college. Every classroom and conference room has a digital presentation system, and five classrooms are outfitted for videoconferencing and distance education instruction.

Faculty members and students can check out wireless laptops, web cameras, computer projectors, digital audio recorders, digital video cameras, iPads, and other devices from the center. In all, the College of Education supports more than 850 computers, laptops, PDAs, and smartphones as well as seven servers.

Grants and Research Services Center

The Grants and Research Services Center (GRSC) provides grant and research-related support services for the college's faculty, staff, and students. GRSC staff members help identify internal and external funding sources, prepare and submit grant proposals and application materials, provide grant accounting services, and help in the preparation of applications for Human Subjects/Institutional Research Board review. The college also provides limited funds for faculty research, professional development, and travel.

Institute on Disability and Rehabilitation Ethics

The Institute on Disability and Rehabilitation Ethics (IDARE) is a cross-disciplinary, cross-institutional online community of scholars. Its goal is to use research, education, and consultation to improve the quality of ethical practice experienced by people with disabilities who receive services
from rehabilitation, health, mental health, and social service professionals. IDARE works to influence disability policy and practice development nationally and locally and to influence professional organizations' consideration of ethical issues that affect people with disabilities and other marginalized populations.

**Iowa Supports Education and Resources for Veterans and Enlisted**

Iowa Supports Education and Resources for Veterans and Enlisted (I-SERVE) was created to help facilitate successful transitions for veterans and enlisted service members into higher education at the University of Iowa. The center is located in the Teacher Leader Center, on the first floor of the North Lindquist Center. The program assists veterans with accessing benefits, the application process, completing course work, preparing for and searching for jobs, and achieving overall career success. I-SERVE also offers educational consultation, workshops, special programs, and presentations that enhance knowledge, skills, and attitudes of teachers and other professionals who work with veterans, military children, and families.

**Iowa Testing Programs**

Iowa Testing Programs (ITP) provides assessment expertise to schools in the State of Iowa and consultation to the Iowa Department of Education and to area education agencies. Its faculty and staff develop standardized educational tests, such as the widely used Iowa Assessments, for use in elementary and secondary schools, as well as other assessment tools to support instruction and learning. Iowa Testing Programs also conducts research studies in educational measurement and evaluation, publishes the results of these studies, sponsors lectures and symposia, provides consulting and in-service training to educators and school systems, and provides training experience for graduate students in educational measurement and evaluation.

**Libraries**

University of Iowa Libraries provides a wide variety of resources in print and online. Course reserve materials are available at the Main Library. An education librarian is available to help students with their research projects and assist faculty members and teaching assistants with their research and instructional needs.

**Office of Graduate Teaching Excellence**

The Office of Graduate Teaching Excellence (OGTE) is dedicated to excellence in college teaching and the preparation of future faculty. The office facilitates opportunities for research, teaching, and service. Through the Iowa Education Fellows Program (i-fellows), OGTE develops and conducts workshops and seminars that address the developmental needs of College of Education doctoral students, from their first semester on campus through completion of their degrees. The office also guides students through the process of earning the graduate Certificate in College Teaching (Graduate College).

**Office of Student Services**

The Office of Student Services assists students, faculty, staff, and the general public in graduate and undergraduate admission, Graduate College examinations, student field experiences, and teacher licensure/certification. It also serves as a liaison with other University units, including the Graduate College, the College of Liberal Arts and Sciences, the Office of Admissions, and the Office of the Registrar, and with external agencies, including the Iowa Department of Education, out-of-state teacher licensure/certification departments, and school district personnel in Iowa and outside of the state. A variety of application and information materials are available at the office and on its website.

**Statistics Outreach Center**

The Statistics Outreach Center (SOC), a service of the College of Education and Iowa Testing Programs, helps the college's faculty, staff, and students use quantitative statistical methods to produce high-quality research. The center offers short-term consulting on statistical data analysis and grant proposals to the College of Education at no charge and provides services to departments and grants outside the college on a fee basis. The SOC also offers a variety of educational opportunities involving statistical software. Information on course schedules, events, resources, and an appointment request form is available on the Statistics Outreach Center website.

**Financial Support**

College of Education students may be eligible for scholarships, awards, or graduate assistantships. Information about financial support for students is available at Scholarships and Awards on the college's website. The Graduate College posts a list of open assistantships on its website; see Graduate Assistantships and Grants.

Students interested in employment opportunities in the college's support units and special resources should contact the director of each facility and indicate their interests, their academic and experience records, and their career or degree goals at the University of Iowa.

**Graduate Assistantships**

Individual academic programs provide opportunities for teaching, research, or service assistantships as well as for fellowships and related employment opportunities. Inquiries should be addressed to the chair of the department or the director of the program in which students believe they can provide service or achieve an outstanding academic record. Assistantship appointments are usually, but not always, made by the program area.

**Special Graduate Research Assistantships in Education**

The Iowa Testing Programs provides funds to support a limited number of special graduate assistantships in education, in which students do research work under the direction of a faculty member of their choice. Students must be enrolled for at least 6 s.h. but not more than 12 s.h. per semester; assistantships are for the academic year and are renewable for a limited number of years. Students admitted to or pursuing any advanced degree program offered by the College of Education are eligible to apply, provided they are committed to a professional career in the United States.

Applicants must submit transcripts of all completed college work (undergraduate and graduate), recommendation forms specific to the assistantship, and scores on the Graduate Record Exam (GRE) General Test. For assistantship application
forms, contact the Iowa Testing Programs director. Application deadline is late February.

Scholarships and Awards

The College of Education presents a number of awards funded by donors; recipients must meet the criteria established by the donors for their awards. Recipients are presented with their award at a spring semester luncheon. For more information, see Scholarships and Awards on the college’s website.

Duane D. Anderson Memorial Scholarship: awarded to a transfer student from an Iowa community college who is currently enrolled in a program in the College of Education.

Jack Bagford Elementary Education Scholarship: presented to an undergraduate or graduate student in elementary education who will be student teaching during the academic year following the award; recipient must be a resident of Iowa.

David and Connie Belin Honors Award: presented to graduating seniors who have completed all requirements for the Honors Opportunity Program.

Blommers-Hieronymus-Feldt Fellowship: presented to doctoral students in educational measurement and statistics.

Lowell Brandt Rehabilitation Counseling Award: presented to graduate students pursuing a master’s degree in the rehabilitation counseling program.

Barry Bratton Memorial Award: presented to graduate students who have course work that reflects a commitment to the systematic design and improvement of instructional processes and materials.

Robert L. Brennan Graduate Student Award: presented to a graduate student in the educational measurement and statistics program based on their research.

Dr. Bettye M. Caldwell and Dr. Fred T. Caldwell Scholarship: presented to undergraduate students interested in pursuing careers in early childhood development including the fields of education, sociology, psychology, and other related academic programs.

Jake and Kimberly Chung Scholarship: presented to a teacher education student for their student teaching semester.

Debra Clausen Memorial Scholarship: presented to a graduate student in the College of Education who will work at the Hospital School (now the Center for Disabilities and Development) to evaluate and develop learning programs for students with mental disabilities, including Down Syndrome, or to students pursuing careers in special education.

T. Anne Cleary Psychological Research Scholarship: presented to students in the Department of Psychological and Quantitative Foundations.
