TEP/Licensure

Teacher Education Programs (TEP) and Student Teaching

The College of Education offers a Teacher Education Program (TEP) that includes preparation for teaching in elementary education (teaching kindergarten through grade 6 or grade 8); and secondary education (teaching one or more subjects in grades 5 through 12). Secondary teacher education is offered in art education, English education, mathematics education, music education, science education, social studies education, special education, and world language education. Three secondary education programs, art education, music education, and special education, prepare students to teach kindergarten through grade 12. In cooperation with the School of Library and Information Science, the college offers graduate-level preparation for school teacher librarians.

Preparation is available for teaching additional subjects; see the section titled "Added Endorsements."

With the Teacher Education Program, the College of Education awards the Bachelor of Arts degree for two majors, elementary education and special education. Majors in art education, English education, mathematics education, music education, science education, social studies education, and world language education require a corequisite content major. See the Department of Teaching and Learning section of the catalog for details about these majors. The majors require admission to the TEP.

Individuals with a previous bachelor's degree or a more advanced degree also may complete a TEP major. See the section titled "Graduate and Nondegree Admission to the TEP" and the Department of Teaching and Learning section of the catalog.

The Office of Student Services provides information on TEP; offers assistance with admission, student field experiences,

and teacher licensure/certification; and serves as a liaison with other university units and external agencies. For more information, visit the Office of Student Services website.

Admission to the Teacher Education Program

Admission to a TEP major is required in order to register for most TEP courses, to participate in field experiences/practicums, and to student teach.

Elementary Education and special education

First-year undergraduate applicants to the bachelor of arts majors in elementary education and special education are admitted to the major and the College of Education upon acceptance to the University of Iowa; these students are guided through TEP application requirements as a part of their first two semesters of coursework. Transfer applicants and current University of Iowa students in other colleges may be admitted to the major; these students complete TEP application requirements independently.

Secondary and K-12 Teacher Education Programs

Undergraduate applicants to the University of Iowa who wish to become teachers in secondary education apply for the content major in the subject they would like to teach. They may also indicate secondary education interest on their application.

Requirements for admission to the TEP include admission to the University of Iowa, a minimum of 30 s.h. of college credit, and a preadmission school field experience. Some programs have additional requirements. Complete application requirements and procedures can be found on the Office of Student Services website. TEP applications are submitted through a web application, Tk20 (Watermark).

For secondary and K-12 programs, admission to the TEP is selective and is based on a faculty review of academic achievement as reflected in grade-point average (GPA), aptitude as reflected by recommendations and personal statements, and the ability of the given program area to provide quality instruction and clinical and field experiences. Meeting the minimum criteria does not ensure program admission.

Application Deadlines

For spring semester admission, applications are open from Sept. 1 to Dec. 1. For summer session or fall semester admission, applications are open from Feb. 1 to May 1. For timely advising and registration, applicants are encouraged to submit the application by Oct. 1 or March 1. See the College of Education website for additional information on TEP application requirements and procedures.

Direct Admission to Music Education

The College of Education offers early admission into the K-12 music education TEP. First-year students who upon graduation from high school have a high school GPA of 3.00 or higher and have been accepted into a music studio are directly admitted into the K-12 music education TEP. This admission is conditional until the minimum admission requirements are complete. The requirements include admission to the School of Music, completion of an essay of 500 words or less on why the applicant wishes to be a music teacher, and completion of a 10-hour preadmission school field experience.

Graduate and Nondegree Admission to the TEP

Students with a previous bachelor's degree may be admitted to a TEP major as graduate or undergraduate students and may have the option to pursue an additional undergraduate or graduate degree or to pursue a TEP major as a nondegree student. See the Department of Teaching and Learning for degree program options. Students must apply to the TEP through the web application, Tk20 (Watermark), and University of Iowa Admissions. Application information is available from the Office of Student Services. Graduate applicants must be eligible for admission to the Graduate College, which requires a GPA of at least 3.00 in all previous college coursework. See the Graduate Admissions website. Undergraduate applicants must meet the general requirements for undergraduate admission to the University of Iowa; see the Undergraduate Admissions website.

TEP Academic and Professional Standards

Teacher candidates in the TEP, including students in TEP Majors who have not yet progressed to full admission to the TEP, must meet grade and GPA requirements and maintain appropriate professional dispositions each semester.

State of Iowa teacher preparation standards require that teacher candidates demonstrate the content, pedagogical, and professional knowledge, skills, and dispositions necessary to help all students learn. Because of this, the College of Education and the Teacher Education Program have established academic and professional standards that students must maintain. The specific criteria that apply to a student depend on the degree program(s) in which the student is enrolled (or if they are a nondegree student), and whether the student is an undergraduate-level or graduate-level, but may include the following.

- University of Iowa cumulative GPA and overall cumulative GPA, based on total hours earned
 - 0-29 overall earned semester hours: minimum of 1.85 (2.70 for good standing)
 - 30 or more overall earned semester hours: minimum of 2.00 (2.70 for good standing)
 - Nondegree students: minimum of 2.00 (2.70 for good standing)
- UI cumulative GPA on graded graduate courses: minimum of 2.75 (consistent with the academic standing policy of the Graduate College)
- TEP major GPA (overall cumulative): minimum of 2.00 (2.70 for good standing)
- A grade of C-minus or higher in TEP major courses
- No notices of concern in professional dispositional qualities
- Academic good standing in the corequisite major
- Major GPA in the TEP CLAS content major: minimum of 2.00 (2.70 for good standing)
- UI major GPA in the TEP CLAS content major: minimum of 2.00 (2.70 for good standing)

For additional information about these standards, contact the Office of Student Services.

InTASC Standards-Based Assessments

Once admitted to the TEP, progress toward meeting professional standards is documented in Tk20 (Watermark), a web-based assessment system. Throughout the program,

students submit assignments designated by their respective program area for standards-based scoring on rubrics in common across all program areas.

Student Teaching

The final phase of the TEP is the professional semester, devoted to supervised student teaching and directed observation in a variety of situations. All coursework in education, for the major, and for the degree must be completed before the student teaching semester. The student teaching semester is a full-time, all-day experience with a full registration, typically a 15 s.h. enrollment. Student teachers are expected to follow the calendar of the district in which they are placed; breaks may not align with the University of Iowa semester calendar. Transfer credit may not be used to satisfy the student teaching requirement.

Faculty members, professional staff, and advanced graduate students who are experienced teachers serve as supervisors. Periodic seminars provide for discussion and evaluation of student-teacher experiences.

To be admitted to the student teaching semester, students submit their application to the Office of Student Services. Student teaching applications are due the calendar year before the student teaching semester: by Nov. 15 for student teaching the following fall semester and by April 15 for student teaching the following spring semester.

Admission to student teaching requires faculty approval based on grade-point average requirements and appropriate professional dispositions. Students on TEP Probation are not permitted to student teach. For more information, contact the Office of Student Services.

Placement Options

Student teaching placements typically are in schools within a 60-70 mile radius of Iowa City, referred to as local placements. Placements also may be available in some school districts in other parts of Iowa, the Midwest region, urban districts in other parts of the United States, and international settings. These placements are referred to as special sites. Special site placements have higher grade-point average requirements and expectations for appropriate professional dispositions.

International student teaching experiences are available primarily through Global Gateway for Teachers, an Indiana University Program working in collaboration with the University of Iowa. International sites vary, depending on available placements and international conditions, but have included Australia, Costa Rica, Ecuador, England and Wales, Greece, India, Ireland, Italy, Japan, New Zealand, Scotland, and Spain. In most locations, students are assisted with housing by an on-site coordinator.

International assignments are for eight weeks. Students complete an eight-week assignment in a local placement or another special site placement followed by an eight-week assignment in an international placement. Secondary education students in some program areas (for instance, English education) are required to complete a full semester of student teaching in the United States before student teaching at an international site.

For more information about international student teaching options, see Student Teaching and Classroom Experience on the College of Education website.

Course Substitutions

Students who have completed courses that they wish to substitute for program requirements should consult with their advisors.

Community college human relations courses are not accepted as substitutes for EPLS:4180 Human Relations for the Classroom Teacher.

Teacher Licensure/Certification

The Iowa Board of Educational Examiners issues teacher, support service, and administrator licenses on the recommendation of Iowa colleges and universities whose programs have been approved by the Iowa State Board of Education.

All University of Iowa educator preparation programs have approval from the Iowa State Board of Education (and Iowa Department of Education) as preparation for a teacher, support service, or administrator license and/or one or more endorsements. For students who declare their intention to seek educator licensure or certification in another state, the College of Education attempts to advise those students of the applicability of the University of Iowa's curriculum to the requirements for licensure in the other state. Students whose primary program of study is an on-campus program are assumed to be located in Iowa.

In general, an educator license in one state is a good basis for licensure in another state and in many cases, states will issue a license to an applicant who is licensed in another state. But, states may require deficiencies to be fulfilled, which could include additional training, courses, tests, or field experiences. Names, terms, and renewal requirements of licenses vary from state to state. Endorsements awarded on another state's license or certificate and the authority provided by those endorsements may be different than those on an Iowa license. For additional information, visit Professional Licensure Disclosures on the Office of the Provost website.

Licensure/certification requirements across the nation are subject to change. Students who plan to seek employment in a state other than Iowa are encouraged to inform themselves about current requirements in that state. In most cases, students applying for an out-of-state license or certificate should first secure an Iowa license.

To be recommended by the University of Iowa, applicants must complete all requirements of the appropriate approved program. A minimum of 20 s.h. of coursework applied to meet program requirements must be earned at the University of Iowa.

The Iowa Board of Educational Examiners requires a national criminal history background check, an Iowa Division of Criminal Investigation background check, and registries and records check for all new applicants for Iowa licensure. Disqualifying criminal convictions and founded child abuse are set out in Iowa Code 272.2 and Iowa Administrative Code 282-25.

The College of Education Office of Student Services provides instructions on application for licenses, fingerprinting procedures, and licensure/certification assistance to all students completing approved programs offered by the college. It also provides assistance to in-service teachers and other school professionals who are interested in adding endorsements to their Iowa license based on completion of State of Iowa minimum licensure requirements.

Liberal Arts Core

State of Iowa teacher preparation standards require a core of liberal arts knowledge including but not limited to English composition, mathematics, natural sciences, social sciences, and humanities. The general education requirements of the College of Education, GE CLAS Core, satisfy this requirement if a course in mathematics, statistics, or computer science is selected for the Quantitative or Formal Reasoning general education requirement. Students who have not completed these requirements with their previous coursework will need additional coursework. For additional information about these standards, contact the Office of Student Services.

Added Endorsements

Current TEP students and in-service teachers may prepare for teaching additional subjects through added endorsement programs and courses.

Most added endorsements for kindergarten through 8th grade (K-8) are intended for TEP students and in-service teachers in elementary education. See the BA in elementary education for these added endorsements. Other endorsements, including most secondary (grades 5-12) endorsements for which the University of Iowa offers a TEP major, can also be available to elementary, secondary, or K-12 TEP students and teachers as added endorsements.

In addition, preparation is offered for these added endorsements.

- Grades 5-8 middle school (language arts, mathematics, science, and/or social studies)
- Grades 5-12 reading
- K-12 athletic coach
- K-12 dyslexia specialist
- K-12 English Language Learner Education (formerly called English as a second language - ESL)
- PK-12 talented and gifted

For additional information contact an academic advisor or licensure staff in the Office of Student Services.
