

Civil Engineering, BSE

Career Advancement

Civil engineering graduates design, develop, and maintain infrastructure systems that support communities and protect natural resources. Career paths include structural design, transportation engineering, construction management, geotechnical engineering, environmental and water resources engineering, and roles focused on resilience and public safety. Graduates may work in consulting firms, government agencies, construction companies, or research organizations, and some continue their education in engineering, planning, public policy, or law.

Engineering Career Services connects students with experiential learning and professional opportunities that support their development as emerging engineers. Staff coordinate the college's co-op and internship program, sustain strong employer relationships, and offer a variety of opportunities for students to engage with industry, including engineering career fairs and additional career-focused programming. The office provides individual advising on resumes, job and internship search strategies, interviewing, and evaluating job offers. Engineering Career Services works closely with the Pomerantz Career Center to facilitate on-campus interviewing, collect postgraduation data, and manage the university's recruiting system, Handshake.
