Chemistry, B.A.

Learning Outcomes
The Department of Chemistry is committed to maintaining excellence in teaching and mentoring, and to providing the maximum educational benefit to each chemistry graduate. The desired outcomes will prepare students for success in graduate or professional school, industry or government employment, and a wide variety of career choices.

The graduate with a bachelor’s degree in chemistry will be able to use the knowledge and skills obtained in the program to demonstrate the following.

• Knowledge and Understanding of Chemistry
  Graduates will be able to demonstrate:
  mastery of major concepts, theoretical principles, and experimental findings in chemistry;
  an understanding of the relationship between molecular structure and physical/chemical properties;
  an understanding of the relationship between the microscopic, macroscopic, and symbolic descriptions of matter and the changes it undergoes; and
  an understanding of the conditions that affect stability and factors that control rates of change.

• Laboratory Skills
  Graduates will be able to:
  assess chemical and procedural hazards involved in laboratory work;
  use strategies to minimize the risks associated with laboratory work;
  maintain a clearly organized laboratory notebook;
  use a variety of synthetic techniques;
  use instrumentation and laboratory techniques to separate, purify, identify, quantify, and characterize chemical species; and
  use computers as tools for data acquisition, management, and analysis.

• Scientific Thinking
  Graduates will be able to:
  pose scientific questions with a clear hypothesis;
  plan and carry out scientific investigations;
  analyze data in order to make inferences about chemical and physical behavior and properties, and construct scientific arguments to support conclusions;
  use scientific theory and/or interpretations of experimental results to explain chemical phenomena;
  use mathematics and computational thinking to understand and predict chemical behavior;
  identify and quantify uncertainties in measurements and limitations in methods; and
  use graphs, diagrams, and other models to communicate chemical information.

• Chemical Information Skills
  Graduates will be able to:
  use modern library search tools to locate and retrieve chemical information;
  read, analyze, and critically evaluate journal articles; and
  reference and cite chemical literature appropriately using designated citation styles.

• Professional Skills
  Graduates will be able to:
  report scientific findings in oral presentations in a clear and organized fashion using appropriate visual tools;
  report on experimental work and scientific findings in written reports;
  communicate results of scientific work to nontechnical audiences;
  work collaboratively with peers to plan and conduct experiments, interpret chemical information, and solve problems; and
  engage in responsible and ethical scientific conduct.

Requirements
The Bachelor of Arts with a major in chemistry requires a minimum of 120 s.h., including 53-54 s.h. of work for the major (20 s.h. in foundation chemistry courses, 12 s.h. in advanced chemistry, and 21-22 s.h. in supporting course work). Students must earn at least 11 s.h. in advanced chemistry courses at the University of Iowa. They must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. Students also must complete the College of Liberal Arts and Sciences GE CLAS Core.

The B.A. degree is a good choice for students interested in medical or other professional schools, or those interested in a teaching career (see Teacher Licensure* below). The program provides students with the flexibility to earn a degree in chemistry while they also complete related courses required for medical school, such as biology and biochemistry. Compared to the B.S. degree, the B.A. has modified mathematics requirements that include a one-semester physical chemistry course, an analytical chemistry course, and a single, integrated capstone laboratory that incorporates analytical, inorganic, and physical chemistry experiments.

Courses in the chemistry major have prerequisites, so they must be taken in the correct order. Advanced chemistry courses are built on the chemistry foundation courses. Most advanced courses are taught only once a year. Students should consult their academic advisors and plan their course schedules carefully. They should take CHEM:2021 Fundamentals of Chemical Measurements during the first semester of the second year.

Students may not use a course to fulfill more than one requirement.
The B.A. with a major in chemistry requires the following course work.

### Chemistry Foundation Courses

Students complete the following foundation courses.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM:1110 &amp; CHEM:1120</td>
<td>Principles of Chemistry I-II</td>
<td>8</td>
</tr>
<tr>
<td>CHEM:2021</td>
<td>Fundamentals of Chemical Measurements</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>One of these sequences:</td>
<td></td>
</tr>
<tr>
<td>CHEM:2210 &amp; CHEM:2220</td>
<td>Organic Chemistry I-II</td>
<td>6</td>
</tr>
<tr>
<td>CHEM:2230 &amp; CHEM:2240</td>
<td>Organic Chemistry I for Majors - Organic Chemistry II for Majors (preferred)</td>
<td>6</td>
</tr>
<tr>
<td></td>
<td>One of these:</td>
<td></td>
</tr>
<tr>
<td>CHEM:2410</td>
<td>Organic Chemistry Laboratory</td>
<td>3</td>
</tr>
<tr>
<td>CHEM:2420</td>
<td>Organic Chemistry Laboratory for Majors (preferred)</td>
<td>3</td>
</tr>
</tbody>
</table>

### Advanced Chemistry

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM:3110</td>
<td>Analytical Chemistry I</td>
<td>3</td>
</tr>
<tr>
<td>CHEM:3120</td>
<td>Analytical Chemistry II (preferred)</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>All of these:</td>
<td></td>
</tr>
<tr>
<td>CHEM:3250</td>
<td>Inorganic Chemistry</td>
<td>3</td>
</tr>
<tr>
<td>CHEM:4430</td>
<td>Principles of Physical Chemistry</td>
<td>3</td>
</tr>
<tr>
<td>CHEM:4450</td>
<td>Synthesis and Measurement</td>

<tr>
<td>PHYS:1611</td>
<td>Introductory Physics I-II</td>
<td>8</td>
</tr>
</tbody>
</table>

### Science Electives

Some of these courses may be used to fulfill other requirements for the major, as listed above; students who have used a course from this list to fulfill another requirement for the major may not use that course as an elective. Students should consult their advisor to gain approval for a course that is not on the list. Undergraduate Research (CHEM:3994) may not be used to satisfy the science electives requirement.

### Teacher Licensure

Majors interested in earning licensure to teach in elementary and/or secondary schools must complete the College of Education's Teacher Education Program (TEP) in addition to the requirements for the major and all requirements for graduation. The TEP requires several College of Education
courses and student teaching. Contact the Office of Student Services for details.

Students must satisfy all degree requirements and complete Teacher Education Program licensure before degree conferral.

Majors who plan to use their work toward a minor in chemistry as academic background for earning teacher licensure should contact the Office of Student Services about requirements.

**Combined Programs**

**B.A./M.A.T.**

Students who are interested in pursuing a graduate degree in teaching may apply to the combined Bachelor of Arts/Master of Arts in Teaching with a science education subprogram offered by the College of Liberal Arts and Sciences and the College of Education. Designed for undergraduates majoring in biology, chemistry, environmental sciences, or physics, the combined program enables students to earn a B.A. and M.A.T. in five years by beginning to earn graduate credit during their fourth year of undergraduate study and by counting up to 18 s.h. of qualifying credit toward both degrees. For more information, see "Combined B.A./M.A.T." under Science Education in the Master of Arts in Teaching (College of Education) section of the Catalog. Interested students should consult an advisor.

**Honors**

**Honors in the Major**

Majors are able to graduate with departmental honors. Students must maintain a cumulative University of Iowa g.p.a. of at least 3.33. In addition, they must complete an undergraduate research project acceptable to their research advisor and must write an honors thesis based on their research. Students should register for CHEM:3994 Undergraduate Research or HONR:3994 Honors Research Practicum to earn credit for their research. They are encouraged but not required to present their research at local and regional meetings and to publish their results in professional journals.

**University of Iowa Honors Program**

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the University’s honors program.

Membership in the UI Honors Program is not required to earn honors in the chemistry major.

**Academic Plans**

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

Courses in the chemistry major have prerequisites, so they must be taken in the correct order. Most advanced courses are taught only once a year. Students should consult their academic advisors and plan their course schedules carefully. They should take CHEM:2021 Fundamentals of Chemical Measurements during the first semester of the second year. Typical chemistry course schedules and a regression list are available at Undergraduate Program in Chemistry on the Department of Chemistry website.

- **Before the third semester begins:** math through MATH:1460 Calculus for the Biological Sciences or calculus I; CHEM:1110 Principles of Chemistry I and CHEM:1120 Principles of Chemistry II, or equivalent course work

- **Before the fifth semester begins:** CHEM:2021 Fundamentals of Chemical Measurements; organic chemistry I, II, and lab; and biostatistics or calculus II

- **Before the seventh semester begins:** two more courses in the major; physics I and II; and at least 90 s.h. earned toward the degree

- **Before the eighth semester begins:** CHEM:4430 Principles of Physical Chemistry and one more course in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate

**Financial Support**

**Scholarships and Awards**

A number of awards and scholarships are available to chemistry majors, including the American Institute of Chemists Award, the Undergraduate Award in Analytical Chemistry, the Chemistry Alumni Awards (one each for a sophomore, a junior, and a senior), the Merck Index Award, and the Viksnins, Harris & Padys PLLP Award.

Chemistry majors also may apply for the Donald J. and Margaret Burton Scholarship, Ken Sando Scholarship, Shoemaker-Strickler Scholarship, E. David Cater Scholarship, and Russell K. Simms Scholarship.

Visit Undergraduate Scholarships and Awards on the Department of Chemistry website.

**Career Advancement**

The undergraduate major in chemistry provides a strong foundation for success in graduate and professional study and for positions in academic or industrial chemistry.

Students with a chemistry degree can pursue careers or graduate study in a wide range of fields. Learn more about career options for chemistry majors on the American Chemical Society website.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.
