Speech Pathology and Audiology, M.A.

The Master of Arts program in speech pathology and audiology provides training for individuals who wish to do clinical work in speech-language pathology or audiology. Graduates of the M.A. program meet all academic and practicum requirements for clinical certification by the American Speech-Language-Hearing Association (ASHA) and for licensure by the State of Iowa. Students preparing for clinical positions in public schools must meet school licensure or certification requirements of the states in which they plan to work.

Requirements

The Master of Arts program in speech pathology and audiology requires a minimum of 38 s.h. of graduate credit, although students typically earn 53-57 s.h. of credit by the time they complete the degree. The program prepares clinicians to be able to function independently in a variety of clinical settings. The program is designed to ensure that upon graduation, a student will meet requirements for immediate professional employment.

M.A. students usually have a background of undergraduate courses in speech and hearing science, psychology of language, and human behavior that is equivalent to an undergraduate major in speech and hearing science at the University of Iowa.

Before registering in the program, entering M.A. students receive descriptive materials about basic science core courses considered to be required preparation for the M.A. program, and required M.A. clinical core courses for which the department may accept comparable courses taken at the undergraduate level. Decisions about incorporating background course work in these areas are made by the faculty advisor in consultation with the student and the instructors of the basic science or clinical core courses. Entering students must have completed the following courses or their equivalents.

A biological science course (human or animal biology) 3
A physical science course (physics or chemistry) 3
A social/behavioral science course 3
CSD:2110 Phonetics: Theory and Applications 3
CSD:3112 Anatomy and Physiology of Speech Production 4
CSD:3113 Introduction to Hearing Science 4
CSD:3116 Basic Neuroscience for Speech and Hearing 3
CSD:3118 Language Acquisition 3
CSD:3185 Hearing Loss and Audiometry 3
CSD:4145 Developmental Language Disorders 3
CSD:4148 Developmental Speech Disorders 3
CSD:4244 Rehabilitative Audiology 3

Core Requirements

All students seeking an M.A. in speech pathology and audiology with professional emphasis in speech-language pathology must take the following.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Semester Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSD:5135</td>
<td>Foundations of Clinical Practice I</td>
<td>2</td>
</tr>
<tr>
<td>CSD:5136</td>
<td>Foundations of Clinical Practice II</td>
<td>1</td>
</tr>
<tr>
<td>CSD:5137</td>
<td>Foundations of Clinical Practice III</td>
<td>1</td>
</tr>
<tr>
<td>CSD:6515</td>
<td>Proseminar (taken fall and spring semesters of first year)</td>
<td>0</td>
</tr>
</tbody>
</table>

In addition, they must take the following courses unless they completed equivalent courses as undergraduates.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Semester Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSD:2140</td>
<td>Manual Communication</td>

<tr>
<td>CSD:6519</td>
<td>Seminar: Evidence-Based Practice</td>
<td>1</td>
</tr>
</tbody>
</table>

Also required are additional semester hours of practicum registration sufficient to meet supervised, direct clinical experience requirements for the Certificate of Clinical Competence of the American Speech-Language-Hearing Association and the Iowa license, and to provide broad, supervised practicum experience.

In addition to the core requirements listed above, all non-thesis students preparing to be speech-language pathologists must earn a minimum of 12 s.h. from the following; thesis students must earn a minimum of 8 s.h. from the following. Thesis students also must enroll in 4 s.h. of research.

PSQF:1020 Elementary Statistics and Inference 3

25 hours of observation documented by a practitioner with ASHA certification

Candidates for an M.A. with a professional emphasis in speech-language pathology are not required to complete a thesis, although all students demonstrating research aptitude and interest are encouraged to do so.

A typical M.A. program usually takes two calendar years to complete but may take longer, depending on a student’s background and personal interests.
M.A. with Professional Licensure

M.A. with Licensure to Work Outside Public Schools

A number of states, including Iowa, require a state license in speech-language pathology or audiology for persons who work in settings outside the public schools. Students who meet the requirements listed above for the M.A. in speech pathology and audiology also meet the academic requirements for the license in Iowa as well as in most other states.

M.A. with Public School Licensure

Students preparing for clinical positions in public schools typically must meet school licensure or certification requirements of the states in which they plan to work. The following criteria meet the requirements for endorsement as speech-language pathologists in Iowa and most other states:

- a master's degree with professional emphasis in speech-language pathology or the equivalent;
- completion of an approved human relations component;
- completion of courses that cover the education of the disabled and the gifted and talented (e.g., exceptional persons, education of the gifted); and
- completion of the requirements in speech-language pathology and the 20 s.h. professional education sequence, including CSD:5104 Language Disorders in School-Aged Children and CSD:5304 Speech Pathology and Outplacement: School as a speech-language pathologist.

The professional education sequence requires course work in the following areas:

- **Curriculum** (e.g., reading, methods, curriculum development)
- **Foundations** (e.g., philosophy of education, foundations of education)
- **Educational measurement** (e.g., tests and measurements, measures and evaluations of instruction)
- **Educational psychology** (e.g., educational psychology, counseling theories and techniques)
- **Special education** (e.g., introduction to special education, exceptional persons, learning disabilities)

Child development (e.g., human growth and development, principles and theories of child development, history and theories of early childhood education)

Note: General Education Program courses (e.g., introduction to psychology, sociology, history, literature, and humanities) do not meet the requirements of the professional education sequence.

**Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

The department requires that applicants take the Graduate Record Examination (GRE) General Test before they apply for admission.

Admission to the M.A. program is competitive; applicants' credentials are considered in relation to those of others in the applicant pool, and a limited number of individuals are admitted to each program. Applicants whose undergraduate g.p.a. is below 3.30 or whose GRE General Test scores are lower than the 40th percentile in any area (verbal, quantitative, and analytic) rarely are admitted to either program.

Admission is for fall; the application deadline is January 1. All applications to the M.A. program must be submitted through CSDCAS (Central Application Service for Communication Science and Disorders).

For detailed information regarding evaluation of applicants, applications materials and requirements, and other matters, see Graduate Program on the department's website.

**Financial Support**

Financial support is based on merit and dependent on availability of funds. For more detailed information, contact the Department of Communication Sciences and Disorders director of graduate studies.

**Career Advancement**

The speech pathology and audiology program provides excellent preparation for a career as a speech-language pathologist or audiologist. There continues to be a strong demand for professionals in these fields, and both speech pathology and audiology are consistently ranked highly in “best job” surveys.

Advanced degree holders may work as a teacher, clinician, and/or researcher in the field of communication sciences and disorders.
