Four-Year Graduation Plan

Nearly all students who enter the University as first-year students are automatically eligible for the University's Four-Year Graduation Plan. Students who fulfill their responsibilities to the plan as outlined at the web site below have a commitment from the University of Iowa that they will be able to enroll in the courses they need to graduate in their primary major in four years.

Students wanting to stay on track for a four-year graduation need to work closely with their advisors to make sure they understand the requirements that must be met, as well as the appropriate sequences in which to take courses.

More information about the Four-Year Graduation Plan and about a student's responsibilities is located on the First-Year Experience web site.

The Plan does not apply to second majors, minors, or certificates. The following majors are not part of the Four-Year Graduation Plan:

- Computer Science
- Elementary Education
- Environmental Sciences
- Informatics
- Nuclear Medicine Technology
- Nursing (B.S.N. competitive admission students)
- Radiation Sciences
- Science Education

Although these departments do not participate in the program, with careful planning students still may be able to complete some of these programs in four years.
