

Economics, BA

The BA in economics incorporates a balance of economic theory, mathematical tools, and field applications.

Students who major in economics complete three sets of requirements for the major: mathematics and statistics courses that provide the skills needed for understanding economic theory and data; economic theory courses that provide the tools needed for analyzing economic issues; and field courses that apply economic tools to business, social, or specialized analytical issues.

The Bachelor of Arts degree is awarded by the College of Liberal Arts and Sciences.
