

Finance, MS

The Master of Science in finance program is an online program that can be completed at a student's own pace. It can be completed in as quickly as one year or in up to ten years.

Learning Outcomes

Students will:

- demonstrate mastery of core finance concepts by accurately explaining, applying, and integrating foundational principles to analyze and interpret financial decisions;
- develop advanced financial expertise by evaluating, designing, and implementing financial strategies and valuation methods;
- demonstrate technical and analytical skills by utilizing quantitative tools and data-driven methods to model, analyze, and interpret complex financial information; and
- critically analyze complex real-world finance problems and recommend effective solutions.
