Biochemistry and Molecular Biology

Chair

Kris A. DeMali

Undergraduate major: biochemistry and molecular biology (BA, BS)

Graduate degrees: MS in biochemistry and molecular biology; PhD in biochemistry and molecular biology

Facilities

The Department of Biochemistry and Molecular Biology occupies 36,700 square feet on the fourth floor of the Bowen Science Building, 3,500 square feet on the third floor of the Medical Education Research Facility, and 1,450 square feet on the fourth floor of the Pappajohn Biomedical Discovery Building in the Fraternal Order of Eagles Diabetes Research Center on the university's health sciences campus. It has a number of well-equipped research laboratories and other departmental facilities, including the Biochemistry Stores, the Mattill Biochemistry Reading Room, and the Heath Conference Room.

The department makes available a number of shared instruments. Faculty, staff, and students in the department have access to a variety of shared Carver College of Medicine resources, including the Protein and Crystallography Facility, the Iowa Institute of Human Genetics Genomics Division (DNA Facility), the Nuclear Magnetic Resonance Facility, and the Central Microscopy Research Facility.
