Microbiology and Immunology

Chair
• Li Wu

Director, Undergraduate Studies
• Richard J. Roller

Director, Graduate Studies
• Timothy L. Yahr

Undergraduate major: microbiology (B.S.)
Undergraduate minor: microbiology
Graduate degrees: M.S. in microbiology; Ph.D. in microbiology
Faculty: https://medicine.uiowa.edu/microbiology/people-0
Website: https://medicine.uiowa.edu/microbiology/

Courses

Microbiology and Immunology Courses

MICR:2157 General Microbiology 3 s.h.
Principles of bacterial and viral diversity, structure, genetics, physiology, and metabolism in contexts of molecular biology, immunology, infectious disease, and environmental microbiology. Prerequisites: BIOL:1411 and CHEM:1110.

MICR:2158 General Microbiology Laboratory 2 s.h.
Practice of basic techniques commonly used today for study of easy-to-grow microorganisms; variety of individual and group lab activities that challenge students to apply observations about bacteria and viruses. Corequisites: MICR:2157, if not taken as a prerequisite.

MICR:3147 Immunology and Human Disease 3 s.h.
Important principles and key concepts in immunology with a focus on the involvement of the immune system in disease pathogenesis; overview of innate and adaptive immune systems and their functions at cellular and molecular levels. Prerequisites: BIOL:1411 with a minimum grade of C and BIOL:1412 with a minimum grade of C.

MICR:3150 Eukaryotic Pathogens and Human Disease 2 s.h.
Foundational understanding of the lifecycle, epidemiology, pathogenesis, diagnosis, and treatment of major eukaryotic pathogens/parasites that cause human disease. Prerequisites: MICR:2157 with a minimum grade of C. Recommendations: genetics, biochemistry, and immunology.

MICR:3159 Bacteria and Human Disease 3 s.h.
Infection and replication strategies of bacteria with an emphasis on human disease; for students interested in microbiology or other biological sciences, epidemiology, and/or health-related occupations. Prerequisites: MICR:2157 with a minimum grade of C.

MICR:3160 Bacterial Physiology and Cell Biology 2 s.h.
Bacterial physiology and cell biology with reference to model organisms and adaptations to extreme environments; topics include energy metabolism, growth, cell structure, macromolecular assembly, cell division, microbial development, and microbial interactions; lectures augmented with readings from primary literature to give students a strong foundation in prokaryotic biology and approaches used in modern microbiology research. Prerequisites: (BIOC:3110 or BIOL:3120) and MICR:2157 with a minimum grade of C.

MICR:3164 Microbiology and Human Health 4 s.h.
Microbiology for nursing, pharmacy, and pre-health professions. Prerequisites: BIOL:1411 or BIOL:1140 or BIOL:1141.

MICR:3165 Bacteria and Human Disease Laboratory and Discussion 3 s.h.
Use of bacterial genetics and molecular biology techniques and methodologies to study bacteria which cause human disease; development of skills in data analysis and presentation, reading scientific literature, and writing scientific abstracts; for students interested in microbiology or other biological sciences, epidemiology, and/or health-related occupations. Prerequisites: MICR:2157 with a minimum grade of C and MICR:2158 with a minimum grade of C. Corequisites: MICR:3159 or MICR:3170, if not taken as a prerequisite.

MICR:3168 Viruses and Human Disease 3 s.h.
Infection and replication strategies of viruses with an emphasis on human disease; for microbiology majors as well as students interested in pre-medicine, biological sciences, epidemiology, and/or other health-related occupations. Prerequisites: BIOL:1412 with a minimum grade of C or MICR:2157 with a minimum grade of C. Corequisites: MICR:3159 or MICR:3170, if not taken as a prerequisite.

MICR:3170 Microbial Genetics 2 s.h.
Genetics of bacteria and bacteriophages including classical, molecular, and genome-wide approaches. Prerequisites: BIOL:2512 with a minimum grade of C or MICR:2157 with a minimum grade of C.

MICR:3177 Virology Discussion 1 s.h.
Students read and discuss papers from virology literature that address current issues in virology. Prerequisites: MICR:2157 with a minimum grade of C. Corequisites: MICR:3168 (if not taken as a prerequisite).

MICR:3178 Virology Laboratory 2 s.h.
Practical approaches to studying viruses; basic techniques in virology including virus detection, virus growth measurement, and virus genetics; introduction to bioinformatic analysis of virus genomes and infections. Prerequisites: MICR:2157 with a minimum grade of C and MICR:2158 with a minimum grade of C. Corequisites: MICR:3168 (if not taken as a prerequisite).

MICR:4161 Undergraduate Research in Microbiology 4-5 s.h.
Experimental research under faculty supervision. Prerequisites: BIOL:1411.

MICR:4163 Seminar: Microbiology 2 s.h.
Current topics in microbiology, immunology, and virology. Prerequisites: 2 of the following are required: MICR:3147 with a minimum grade of C, MICR:3159 with a minimum grade of C, MICR:3160 with a minimum grade of C, MICR:3168 with a minimum grade of C, MICR:3170 with a minimum grade of C. Requirements: senior standing.
MICR:4171 Honors Undergraduate Research in Microbiology  
Experimental research under faculty supervision. 
Prerequisites: BIOL:1411. Requirements: microbiology major, 
junior or senior standing, 3.33 overall g.p.a., and 3.33 g.p.a. in 
microbiology courses.

MICR:4175 Topics in Parasitism  
Molecular and immunologic mechanisms by which bacteria, 
viruses, and protozoa cause human diseases; based on 
manuscript readings and/or student presentations. 
Requirements: junior or higher standing in microbiology 
or related discipline, and current or prior research in a 
microbiology and immunology laboratory.

MICR:5218 Microscopy for Biomedical Research  
Basic microscopy methods for research including optics, 
preparation, and analysis of biomedical specimens; light, 
fluorescence, confocal, transmitting electron, scanning 
electron, atomic force microscopes, elemental analysis; 
immunochemistry and stereochemistry techniques; individualized 
laboratory instruction. Prerequisites: BIOL:2723. Same as 
ACB:5218, BIOL:5218.

MICR:5264 Directed Study in Microbiology  
Advanced-level experimental research or teaching under 
faculty supervision.

MICR:5875 Perspectives in Biocatalysis  
Applied enzymology, protein design, structure- 
activity relationships, biosensor technology, microbial 
transformations, biodegradation of environmental pollutants. 
Requirements: graduate standing in a participating 
department supported by the Predoctoral Training Program 
in Biotechnology. Same as BIOC:5875, CBE:5875, CEE:5875, 
CHEM:5875, PHAR:5875.

MICR:6201 Graduate Immunology  
Ontogeny, activation, and function of T lymphocytes and B 
lymphocytes; innate immune effector mechanisms; major 
histocompatibility complex; antigen presentation; thymocyte 
positive and negative selection; signaling of T lymphocytes, B 
lymphocytes; emphasis on experimental methods for analysis 
of these processes. Prerequisites: MICR:3147. Requirements: 
for IMMU:6201—college biology, general chemistry, and 
introductory immunology courses; for MICR:6201—courses in 
college biology, genetics, general chemistry, and introductory 
immunology. Recommendations: for IMMU:6201—courses in 
biochemistry and genetics; for MICR:6201—biochemistry 
course. Same as IMMU:6201.

MICR:6240 Graduate Eukaryotic Pathogens and Human Disease  
Foundational understanding of the lifecycle, epidemiology, 
pathogenesis, diagnosis, and treatment of major 
eukaryotic pathogens/parasites that cause human disease. 
Recommendations: genetics, biochemistry, and immunology.

MICR:6247 Graduate Immunology and Human Disease  
Important principles and key concepts in immunology with a 
focus on the involvement of the immune system in disease 
pathogenesis; overview of innate and adaptive immune 
systems and their functions at cellular and molecular levels; 
learning enhanced by case-based, small-group discussion and 
writing exercises. Same as IMMU:6247.

MICR:6250 Mechanisms of Parasitism Journal Club  
Reviews of recent publications in molecular parasitology 
research and thesis research by training grant or journal club 
students. Same as MMED:6250.

MICR:6255 Graduate Experimental Approaches to 
Molecular Microbiology  
Exposure to common experimental approaches through 
examination of primary literature and facilitated discussions 
on application of those approaches to advance scientific 
study. Requirements: microbiology graduate standing.

MICR:6259 Graduate Bacteria and Human Disease  
Infection and replication strategies of bacteria with an 
emphasis on human disease; discussion focuses on 
experimental approaches used to study mechanisms of 
disease.

MICR:6260 Graduate Bacterial Physiology and Cell 
Biology  
Bacterial physiology and cell biology with reference to 
model organisms and adaptations to extreme environments; 
topics include energy metabolism, growth, cell structure, 
macromolecular assembly, cell division, microbial 
development, and microbial interactions; lectures augmented 
with readings from primary literature to give students a strong 
foundations in prokaryotic biology and approaches used in 
modern microbiology research.

MICR:6265 Introduction to Grant Writing  
How to think and write like scientists and become familiar with 
the elements of a research proposal; writing a grant proposal 
modeled on a National Institutes of Health Exploratory/ 
Developmental Research Grant Award (NIH R21); students 
critique proposals written by other students; faculty read 
proposals and provide constructive criticism; lectures describe 
elements of a grant proposal and strategies for effective 
writing. Requirements: enrollment in microbiology graduate 
program, or enrollment in a graduate program training in a 
microbiology and immunology laboratory, or enrollment in a biological science graduate program and 
not working in a microbiology and immunology laboratory 
for thesis project.

MICR:6267 Graduate Viruses and Human Disease  
Infection and replication strategies of viruses with an 
emphasis on human disease; discussion focuses on 
topics and techniques used in primary literature and development of 
specific aims for a mini-proposal.

MICR:6268 Biology and Pathogenesis of Viruses  
Molecular biology of animal DNA and RNA viruses, viral 
immunology and pathogenesis, and interaction of these 
viruses with eukaryotic cells; mechanisms of viral latency, 
persistence, cellular transformation, oncogenesis; virology 
literature. Prerequisites: MICR:3168 or MICR:6267.

MICR:6269 Graduate Virology Discussion  
Discussion of primary virology literature from a range of 
topics, may include techniques used for studying viruses, 
viral entry and replication, evasion of immune responses by 
viruses, vaccines, and viral pathogenesis; short presentations; 
development of specific aims for a mock grant proposal on 
virology-related topic. Recommendations: completion of a 
virology course.

MICR:6270 Graduate Microbial Genetics  
Genetics of bacteria and bacteriophages including classical, 
molecular, and genome-wide approaches.

MICR:7207 Advanced Topics in Immunology  
In-depth analysis of selected areas. Prerequisites: IMMU:6201 
or MICR:6201. Same as IMMU:7221.

MICR:7261 Graduate Research in Microbiology  
Requirements: microbiology graduate standing.
MICR:7263 Graduate Student Research Seminar  1 s.h.
Presentation of thesis work in progress. Requirements:
microbiology graduate standing.

MICR:7265 Topics in Virology Literature  1 s.h.
Papers of current interest in primary virology literature.

MICR:8230 Dental Microbiology  3 s.h.
Medical microbiology: bacteriology, immunology, pathogenic
bacteriology, virology, mycology, parasitology. Requirements:
D.D.S. enrollment.
