

Radiation Sciences

diversity in the broadest sense to mean inclusion of all persons. The programs it offers strive to create a welcoming and inclusive culture.

Director, Baccalaureate Degrees in the Radiation Sciences

- Stephanie Ellingson

Director, Diagnostic Medical Sonography

- Stephanie Ellingson

Director, Radiation Therapy

- Jared L. Stiles

Director, Radiologic Technology

- Holly Bonfig-Becker

Director, Student Affairs

- Jennifer J. Maiers

Undergraduate major: radiation sciences (BS)

Website: <https://medicine.uiowa.edu/radsci/>

Radiation sciences professionals work with physicians to gather accurate patient information for diagnosis, treatment, and/or research of disease and injury. They provide direct patient care, produce quality images, and deliver treatment using a variety of radiation sources. The radiation sciences professional must apply knowledge, skill, and mature judgment while operating complex equipment safely and efficiently. Strong communication, organizational, and patient care skills are essential for a successful career in radiation sciences.

The University of Iowa's radiation sciences educational programs are designed to provide students with opportunities for intellectual, professional, and social growth. Students learn with faculty members and instructors who are committed to radiation sciences education.

Radiation sciences is one of two undergraduate majors in the field of medical imaging offered by the Carver College of Medicine. It encompasses radiologic technology, breast imaging, computed tomography, magnetic resonance imaging, cardiovascular interventional, diagnostic medical sonography, and radiation therapy programs. The other undergraduate major in medical imaging is nuclear medicine technology; see Nuclear Medicine Technology in the catalog.

The Carver College of Medicine is located on the University of Iowa health sciences campus, which includes University of Iowa Health Care, one of the nation's largest university-owned teaching hospitals. For information about the college's academic programs and resources, see Carver College of Medicine in the catalog.

UI Health Care and the Carver College of Medicine have a proud academic tradition of preparing students for successful careers in the radiation sciences. Today, that tradition continues through its strong curriculum, quality clinical experience, and commitment to undergraduate education in the creation of images and treatment of patients using highly sophisticated equipment and techniques.

The Carver College of Medicine, in partnership with the Department of Radiology, shares the university's commitment to equal access, and consistent with its academic mission and standards, strives to achieve excellence through the advancement of diversity, equity, and inclusion. The college is mindful of all aspects of human difference and defines
