Website: https://medicine.uiowa.edu/radiology/

The Department of Radiology has a three-fold mission
of education, research, and patient care. It trains Doctor
of Medicine students, residents, and fellows and offers
programs for medical professionals. It is a leader in innovative
research relating to diagnosis and treatment across the
clinical subspecialties, including MRI, PET, breast imaging,
cardiac and pulmonary imaging, and imaging informatics.
Residents, fellows, medical students, and graduate students
have opportunities to participate in research projects in the
department. The radiology library provides varied resources
and services for department faculty and staff.

The department also provides diagnostic and therapeutic
radiology services for patients and families in Iowa and
surrounding states through its clinical services at University of
Iowa Health Care. Visit the Department of Radiology website
to learn more about the department’s activities and resources.

Undergraduate Education

The Department of Radiology offers clinical education to
students in the Nuclear Medicine Technology and Radiation
Sciences programs.
