Genetics Courses (GENE)

GENE Courses

This is a list of courses with the subject code GENE. For more information, see Genetics (Graduate College) in the Catalog.

- **GENE:4213 Bioinformatics** 2-4 s.h.
  Overview of bioinformatics topics, including access to sequence data, pairwise and multiple sequence alignment algorithms, molecular phylogeny, microarray data analysis, protein analysis, proteomics and protein structure analysis; emphasis on each topic includes biological motivation, computational approach (practical and theoretical), and interpretation of output. Prerequisites: BMB:3120 or MICR:3170 or BIOL:2512 or BMB:3110. Recommendations: grade of B+ or higher in BIOL:2512 or BIOL:2520, or graduate standing. Same as BIOL:4213, IGPI:4213.

- **GENE:6150 Genetic Analysis of Biological Systems** 3 s.h.
  Genetic techniques and approaches for analysis of biological processes; comparison of strengths, weaknesses of a variety of experimental systems.

- **GENE:6200 Special Topics in Genetics** 1 s.h.
  Current research in a selected field of genetics; different topic each year. Companion to a genetics seminar series. Same as ACB:6200.

- **GENE:6210 Seminars in Genetics** 1 s.h.
  Attendance at weekly forum and presentation of research data to foster oral communication, presentation skills, and collaboration.

- **GENE:6234 Basic Biostatistical Methods with Genetics Applications** 1 s.h.
  Introduction to terminology, fundamental concepts, and methods of biostatistics as applied to genetic research; genetic investigation examples used to illustrate statistical approaches.

- **GENE:6280 Directed Study in Genetics** arr.

- **GENE:7191 Human Molecular Genetics** 3 s.h.
  Molecular genetic approaches to human disease; the human genome project, linkage analysis, candidate gene screening, special features of inbred populations, triplet repeat expansions, mitochondrial genetics, genetics of complex traits. Requirements: fundamental genetics and molecular biology.

- **GENE:7301 Graduate Research in Genetics** arr.
