Genetics Courses (GENE)

This is a list of all genetics courses. For more information, see Genetics.

**GENE:4213 Bioinformatics 2,4 s.h.**
Overview of bioinformatics topics, including access to sequence data, pairwise and multiple sequence alignment algorithms, molecular phylogeny, microarray data analysis, protein analysis, proteomics and protein structure analysis; emphasis on each topic includes biological motivation, computational approach (practical and theoretical), and interpretation of output. Prerequisites: BIOC:3120 or MICR:3170 or BIOL:2512 or BIOC:3110. Recommendations: grade of B+ or higher in BIOL:2512 or BIOC:3120, or graduate standing. Same as BIOL:4213, IGPI:4213.

**GENE:5173 Computational Genomics 3 s.h.**
Introduction to computational methods used in genome analysis and functional genomics; biological sequence analysis, sequence database search, microarray data analysis, biological network analysis; in-depth coverage of principal genome science challenges and recent solutions. Prerequisites: (BIOS:4120 or STAT:3510) and (CS:5110 or ENGR:1300). Recommendations: completion of BME:5320. Same as BIOL:5320, BME:5330, ECE:5220, IGPI:5330.

**GENE:6150 Genetic Analysis of Biological Systems 3 s.h.**
Genetic techniques and approaches for analysis of biological processes; comparison of strengths, weaknesses of a variety of experimental systems.

**GENE:6200 Special Topics in Genetics 1 s.h.**
Current research in a selected field of genetics; different topic each year. Companion to a genetics seminar series. Same as ACB:6200.

**GENE:6234 Basic Biostatistical Methods with Genetics Applications 1 s.h.**
Introduction to terminology, fundamental concepts, and methods of biostatistics as applied to genetic research; genetic investigation examples used to illustrate statistical approaches.

**GENE:6280 Directed Study in Genetics arr.**

**GENE:7191 Human Molecular Genetics 3 s.h.**
Molecular genetic approaches to human disease; the human genome project, linkage analysis, candidate gene screening, special features of inbred populations, triplet repeat expansions, mitochondrial genetics, genetics of complex traits. Requirements: fundamental genetics and molecular biology.

**GENE:7301 Graduate Research in Genetics arr.**
