

Doctor of Dental Surgery, DDS

Combined Programs

Bachelor's Degree/DDS

The College of Liberal Arts and Sciences (CLAS) allows its students to count 30 s.h. of elective credit earned in any other University of Iowa college toward graduation with a bachelor's degree. Under this policy, CLAS students who enroll in the College of Dentistry before completing their bachelor's degree may be able to complete their degree during their first year in dentistry. Students planning to take advantage of this plan must satisfy the CLAS residence requirement in order to enroll in the College of Dentistry. They must also fulfill all requirements for the bachelor's degree, including the GE CLAS Core requirements and the requirements for a major. Contact the College of Liberal Arts and Sciences for more information.
