Oral Science, MS

Requirements

The Master of Science program in oral science requires a minimum of 30 s.h. of graduate credit, including 21 s.h. of coursework, 9 s.h. of independent research leading to a thesis, and a final examination.

Students pursuing the MS must be enrolled in a clinical specialty training program offered by a College of Dentistry department. Specific course requirements vary depending on the clinical specialty. Students should complete the MS and the clinical specialty training program in three years of study.

The master's program is offered in conjunction with a certificate in one of five clinical specialties: endodontics, periodontics, prosthodontics, operative dentistry, and oral pathology, radiology, and medicine.
