Orthodontics

**Head**
- Lina M. Moreno Uribe

**Professional certificate:** orthodontics  
**Graduate degree:** M.S. in orthodontics  
**Faculty:** https://dentistry.uiowa.edu/directory?cohort=449167&page=1&size=10  
**Website:** https://dentistry.uiowa.edu/departments/orthodontics

The Department of Orthodontics educates predoctoral, professional, and resident/graduate students for careers as practicing dentists, orthodontists, researchers, and teachers. The department also conducts major research programs and receives significant funding from the National Institutes of Health (NIH). It delivers state-of-the-art treatment to patients—adults, children, and adolescents with a range of orthodontic, craniofacial, and related issues.

The goal of the resident/graduate program in orthodontics is to educate competent individuals to initially practice orthodontics and dentofacial orthopedics. Additional goals include providing clinical services for citizens of Iowa and educating students in methods of scientific inquiry. The programs' objectives are to provide students with an in-depth education in biological and biomechanical principles related to orthodontics; to teach students to diagnose, plan, and deliver comprehensive orthodontic health care service; and to develop students' research and service skills.

Opportunities are available for research and independent study in the department, and there are special facilities for research in biomechanics and craniofacial growth. Interaction with other departments provides learning and research opportunities in surgical orthodontics, cleft lip and palate treatment, speech pathology, animal experimentation, and human growth.

**D.D.S. Student Training**

The Department of Orthodontics prepares Doctor of Dental Surgery students to competently recognize malocclusions of teeth in preparation for decision making regarding treatment or referral. The lecture course guides D.D.S. students in learning concepts of dental development and facial growth to maturity, as well as treatment-oriented subject matter ranging from limited, interceptive treatment through possible comprehensive treatment options. In a laboratory course, case-based material is utilized to give students experience with evaluating diagnostic casts, radiographs, and clinical findings for space management decision-making purposes. Experience also is included in the basics of fabricating a limited range of orthodontic appliances.

**Programs**

**Professional Program of Study**

**Certificate**
- Certificate in Orthodontics

**Graduate Program of Study**

**Major**
- Master of Science in Orthodontics

**Courses**

**Orthodontics Courses**

- **ORDN:5200 Control Theory and Craniofacial Morphogenetic Systems** 0-1 s.h.
- **ORDN:5201 Orthodontic Theory: Diagnosis and Treatment Plan** 0,2 s.h.
- **ORDN:5202 Diagnosis and Treatment Planning** 0,2 s.h.
- **ORDN:5203 Advanced Orthodontic Technique** 0-3 s.h.
- **ORDN:5204 Biomechanics** 0-3 s.h.
- **ORDN:5205 Facial Growth** 0-2 s.h.
- **ORDN:5217 Cephalometrics** 0-3 s.h.
- **ORDN:5220 Craniofacial Anatomy** 0-3 s.h.
- **ORDN:5221 Surgical Orthodontic Seminar** 0-1 s.h.
- **ORDN:5400 Dental Treatment of Maxillofacial Deformities** 0,2 s.h.
- **ORDN:6211 Problems: Orthodontics** 0-3 s.h.
- **ORDN:6212 Research: Orthodontics** 0-3 s.h.
- **ORDN:6215 Orthodontic Journal Club** Current biological, technical publications.
- **ORDN:8215 Growth and Development** 1 s.h.
- **ORDN:8235 Orthodontic Laboratory** 1 s.h.
- **ORDN:8236 Orthodontic Treatment** 1 s.h.

From patient management to use of appliances for correcting some malocclusions in the general practitioner's office.
