Coordinator, Applied Behavior Analysis

Seth A. King (Teaching and Learning)

Graduate certificate: applied behavior analysis

Faculty: <https://education.uiowa.edu/directory>

Website: <https://education.uiowa.edu/areas-study/continuing-education/certificates-and-endorsements/certificate-applied-behavior>

The purpose of the graduate Certificate in Applied Behavior Analysis is to provide professionals who have a background in education, psychology, and related services with expertise in behavior intervention and intensive educational interventions. Students who complete the program are eligible for national certification as board-certified behavior analysts. Applied behavior analysis is a growing service sector with opportunities for employment in schools, universities, and independent clinics.

The certificate program is intended for students who have or are currently pursuing a graduate level degree. Undergraduate students interested in applied behavior analysis should consider the Master of Arts non-licensure degree in special education with a concentration in applied behavior analysis.

The Certificate in Applied Behavior Analysis is administered by the Department of Teaching and Learning and is granted by the Graduate College.

For more information, visit Certificate in Applied Behavior Analysis on the College of Education website.
