Bachelor of Science in Engineering

**Undergraduate major:** B.S.E.

**Website:** https://engineering.uiowa.edu/

## Admission

First-year students are eligible for direct admission into the College of Engineering if they meet the Iowa Board of Regents score of at least 265 on the Regent Admission Index (RAI), have a cumulative high school g.p.a. of at least 3.33, and meet the high school course requirements.

Engineering high school course requirements include:

- four years of English/language arts;
- four years of mathematics (including two years of algebra, one year of geometry, and one year of higher math such as precalculus or equivalent);
- two years of a single world language;
- three years of natural science, preferably with at least one year of chemistry and at least one year of physics; and
- two years of social studies.

Grades of A or B in all high school math and science courses are highly recommended.

Students who are unsure whether to pursue a degree in engineering or a degree in liberal arts and sciences are strongly encouraged to begin in engineering if they meet the admission requirements.

Students who fall short of the engineering admission requirements may enroll in the College of Liberal Arts and Sciences and be designated as Engineering Interest students. They may apply to transfer into the College of Engineering for the following semester once they have successfully completed MATH:1550 Engineering Mathematics I: Single Variable Calculus (or equivalent), and either CHEM:1110 Principles of Chemistry I or PHYS:1611 Introductory Physics I with grades of A or B.

More information about admission and the College of Engineering is available; see First-Year Students on the College of Engineering website.

## Transfer Applicants

Transfer applicants must have completed the same high school unit requirements as entering first-year students and must submit an official high school transcript as well as a transcript of college work undertaken at other institutions. To transfer to the College of Engineering, students must have demonstrated success in math, science, and engineering courses, ideally earning all As and Bs with no grade lower than a C in those foundation subjects. Transfer students must have completed MATH:1550 Engineering Mathematics I: Single Variable Calculus (or equivalent), and either CHEM:1110 Principles of Chemistry I or PHYS:1611 Introductory Physics I (the first semester of chemistry designed for majors or the first semester of calculus-based physics) or their equivalents. Grades earned in additional math, science, and engineering courses, and overall grade-point average also are considered in transfer applications.

Information about admission requirements for transfer students is available on the college’s website.
