

# Computer Engineering, BSE

## Career Advancement

Computer engineering graduates pursue careers in software development, systems engineering, cybersecurity, embedded systems, data science, artificial intelligence, networking, and related technical fields. They work in industries such as technology, aerospace, healthcare, telecommunications, manufacturing, and energy, and many also engage in research or entrepreneurial ventures. Graduates may continue their education in computer science, engineering, or other disciplines that rely on advanced computational and analytical skills.

Engineering Career Services connects students with experiential learning and professional opportunities that support their development as emerging engineers. Staff coordinate the college's co-op and internship program, sustain strong employer relationships, and offer a variety of opportunities for students to engage with industry, including engineering career fairs and additional career-focused programming. The office provides individual advising on resumes, job and internship search strategies, interviewing, and evaluating job offers. Engineering Career Services works closely with the Pomerantz Career Center to facilitate on-campus interviewing, collect postgraduation data, and manage the university's recruiting system, Handshake.
