Biomedical Engineering, B.S.E.

Combined Programs

B.S.E./M.S. in Biomedical Engineering

The College of Engineering offers a combined Bachelor of Science in Engineering/Master of Science for biomedical engineering undergraduate students who intend to earn a M.S. in biomedical engineering. Students admitted to this program are allowed to apply three engineering courses (9 s.h.) towards both the B.S.E. and M.S. degree requirements, take an additional 3 s.h. of graduate coursework before completing their B.S.E., and attend and participate in the departmental graduate seminar. Students may begin to work on their coursework or master's thesis starting as early as the summer following the junior year of undergraduate studies.

Students applying to the B.S.E./M.S. program in biomedical engineering must meet the following criteria at the time of application:

- a minimum of 80 s.h. completed towards their B.S.E. degree,
- a cumulative g.p.a. of 3.50 or higher, and
- identification of a thesis or project mentor.

B.S.E./M.P.H. (Occupational and Environmental Health Subprogram)

The combined B.S.E. in biomedical engineering/M.P.H. with the occupational and environmental health subprogram enables undergraduate students majoring in biomedical engineering to begin work toward the M.P.H degree while completing their bachelor's degree. Students may count 15 s.h. of credit toward both the B.S.E. and the M.P.H. degree requirements. See the Master of Public Health, M.P.H. (occupational and environmental health subprogram) in the Catalog.

B.S.E./M.S. in Electrical and Computer Engineering

B.S.E. students majoring in biomedical engineering who are interested in earning a Master of Science in electrical and computer engineering may apply to the combined B.S.E./M.S. program offered by the College of Engineering. The combined program permits students to count a limited amount of credit toward the requirements of both degrees. See the M.S. in electrical and computer engineering in the Catalog.

B.S.E. (Biomechanics and Biomaterials Track)/M.S. in Occupational and Environmental Health (Industrial Hygiene Subprogram)

B.S.E. students majoring in biomedical engineering in the biomechanics and biomaterials track who are interested in earning a Master of Science in occupational and environmental health with an industrial hygiene subprogram may apply to the combined B.S.E./M.S. program offered by the College of Engineering and the College of Public Health. The combined program permits students to count a limited amount of credit toward the requirements of both degrees, enabling them to begin the study of public health before they complete their bachelor’s degree. See the M.S. in occupational and environmental health undergraduate to graduate (U2G) information on the Department of Occupational and Environmental Health (College of Public Health) website.
