Human Toxicology

**Director**
- Peter S. Thorne (Occupational and Environmental Health/Civil and Environmental Engineering)

**Director, Graduate Studies**
- Jong Sung Kim (Occupational and Environmental Health)

**Graduate degrees:** MS in human toxicology; PhD in human toxicology

**Faculty:** https://toxicology.grad.uiowa.edu/faculty

**Website:** https://toxicology.grad.uiowa.edu

Toxicology is the study of how biological, chemical, physical, and radiological agents affect living organisms and the ecosystem, and how to prevent or lessen the adverse effects of those agents. The Human Toxicology Program prepares toxicologists to identify and assess environmental exposures, identify mechanisms by which toxicants affect homeostasis or induce disease, identify interventions to prevent adverse effects, and estimate acceptable levels of exposure to protect public health.

The program is interdisciplinary, involving the Graduate College, the College of Public Health, the Carver College of Medicine, and the colleges of Engineering, Liberal Arts and Sciences, and Pharmacy.

The Graduate College supports the Human Toxicology Program. Students receive support from the Iowa Superfund Research Program, the Environmental Health Sciences Research Center, and other faculty research grants.

**Programs**

**Graduate Programs of Study**

**Majors**
- Master of Science in Human Toxicology
- Doctor of Philosophy in Human Toxicology

**Facilities**

Training is conducted primarily in laboratories and teaching facilities of the departments and colleges of Human Toxicology Program faculty members. These are among the best-equipped laboratories on campus. Together with the university’s central research facilities, they provide access to the most up-to-date research equipment and expertise.

**Courses**

**Human Toxicology Courses**

TOX:7180 Toxicology Research Seminar 0-1 s.h.
Contemporary research topics.

TOX:7201 Toxicology Research arr.
Research that constitutes part of the thesis.

Thesis or dissertation research; seminar preparation.

TOX:7171 Special Problems in Toxicology arr.
Didactic material that may include tutorial, seminar, or faculty-directed research work; or a special topic.

TOX:7173 Professional Development in Toxicology arr.
Presentations and discussion on professional development topics including toxicology research methods and analysis, grant writing, proposal development, oral presentation skills, networking, and creating a portfolio framework that can be used after graduation.
