

Immunology, PhD

Learning Outcomes

Students will:

- develop the ability to think critically and work collaboratively;
- develop the ability to evaluate data and scientific literature;
- develop the ability to problem solve, expand technical skills, and design rigorous and reproducible experiments;
- develop the ability to communicate their scientific findings and knowledge via both written and oral methods to a variety of audiences; and
- prepare for independent careers as leaders, investigators, and educators in cutting-edge research, teaching, and service in basic and applied immunology.
