Informatics, M.S.

The M.S. in informatics is a non-research, course-based program for students who wish to enhance their careers with advanced knowledge of informatics. The coursework combines core informatics courses with cognate courses in one of these areas: geoinformatics, health informatics, or human-computer interaction.

Learning Outcomes

Students will exhibit:

- understanding of computational thinking concepts,
- experience in software development,
- expertise in data analytics methods,
- comprehension of and practice applying human-centered computing concepts,
- awareness of professional ethics, and
- domain-specific knowledge and skills related to the cognate area.
