Informatics, MS

The MS in informatics is a non-research, course-based program for students who wish to enhance their careers with advanced knowledge of informatics. The coursework combines core informatics courses with cognate courses in one of these areas: geoinformatics, health informatics, or human-computer interaction.

Learning Outcomes

Students will exhibit:

• understanding of computational thinking concepts;
• experience in software development;
• expertise in data analytics methods;
• comprehension of and practice applying human-centered computing concepts;
• awareness of professional ethics; and
• domain-specific knowledge and skills related to the cognate area.
