

Aging and Longevity Studies, Certificate

Requirements

The undergraduate Certificate in Aging and Longevity Studies requires 18 s.h. of credit. Students must maintain a grade-point average of at least 2.00 in work for the certificate.

The certificate may be earned by any student admitted to the University of Iowa who is not enrolled in a UI graduate or professional degree program. Undergraduate to Graduate (U2G) students may earn the certificate when the undergraduate classification is primary.

Undergraduate students may earn the undergraduate certificate or the minor in aging and longevity studies, but not both.

The Certificate in Aging and Longevity Studies takes a multidisciplinary approach to gerontology. Its coursework has been coordinated and sequenced to provide a broad background in aging for students from varied disciplines. Students should speak with the aging and longevity studies coordinator about their intent to earn the certificate and declare the certificate program in MyUI. They work with their academic advisors and the coordinator to develop an individual plan of study that complements their degree program and career interests.

The certificate's required 18 s.h. of credit must be earned in aging and longevity studies courses (prefix ASP) and other courses approved for the program. With permission from the aging and longevity studies coordinator, students also may be able to use other aging-related courses for the certificate. Students must earn at least 12 s.h. of certificate credit in courses numbered 2000 or above, and they must earn at least 12 s.h. toward the certificate at the University of Iowa.

Certificate requirements include a core curriculum of five courses and an additional 3 s.h. of elective coursework from the list of approved aging-related courses. Students may take core courses before or concurrently with other courses in the program, but they should complete the core courses before they enroll in the internship.

Students who complete an aging-related internship or practicum in their major field may be able to count that experience as their aging and longevity studies internship; consult with the aging and longevity studies coordinator. Transfer credit requests are evaluated individually by the aging and longevity studies coordinator.

The Certificate in Aging and Longevity Studies requires the following coursework.

Core Courses

All certificate students must complete five core courses.

Course #	Title	Hours
Both of these:		
ASP:1800/ CSD:1800/ NURS:1800/ SSW:1800/TR:1800	Aging Matters: Introduction to Gerontology (recommended as first course for the certificate)	3
ASP:3150	Psychology of Aging	3
One of these:		

ASP:2181/ ANTH:2181/ GHS:2181	The Anthropology of Aging	3
ASP:3135/ GHS:3050/ SSW:3135	Global Aging	3
One of these:		
ASP:3170	Health and Aging	3
ASP:4470/HHP:4470	Physiology of Aging	3
NURS:3138	Nursing and Pharmacological Interventions I	5
One of these:		
ASP:4190/ SSW:4190	Aging Studies Internship and Seminar	3
NURS:3615	Adult Medical/Surgical Nursing Practicum	3

Electives

Students must complete an additional 3 s.h. of elective coursework selected from aging and longevity studies courses (prefix ASP), NURS:3620 Gerontological Nursing, and/or from approved aging-related courses offered by other academic units. Practicum and/or research courses offered by other academic units may be accepted for internship credit if they focus on aging; students who wish to apply coursework from other departments should consult the Aging and Longevity Studies Program.

Courses not used to satisfy the core courses requirement can be used to meet the electives requirement.
