

Anthropology, B.A.

Learning Outcomes

Students should be able to:

- describe a broad range of changing and diverse human experiences and practices across time and space;
- demonstrate how diverse cultural backgrounds and structural inequalities, including race, gender, class, and other socially constructed categories of difference, relate to peoples' beliefs, experiences, and practices;
- explain the evolutionary perspective as it pertains to human and nonhuman primates, including origins, behavior, ecology, and biocultural variation;
- apply anthropological research tools to collect and interpret data; and
- communicate anthropological concepts and findings.
