Anthropology, BA

Learning Outcomes

Students should be able to:

• describe a broad range of changing and diverse human experiences and practices across time and space;

• demonstrate how diverse cultural backgrounds and structural inequalities, including race, gender, class, and other socially constructed categories of difference, relate to peoples’ beliefs, experiences, and practices;

• explain the evolutionary perspective as it pertains to human and nonhuman primates, including origins, behavior, ecology, and biocultural variation;

• apply anthropological research tools to collect and interpret data; and

• communicate anthropological concepts and findings.
