Anthropology, B.A.

Learning Outcomes

Students should be able to:

- describe a broad range of changing and diverse human experiences and activities across time and space;
- relate one’s cultural background, including the social constructs of race, gender and other categories of inequality, to one’s perceptions and experiences;
- understand the evolutionary perspective as it applies to primates, including human origins, behavior, ecology, and biocultural variation;
- apply anthropological research tools from the four fields of anthropology—linguistic anthropology, biological anthropology, archaeology, and sociocultural anthropology—to collect and interpret data; and
- effectively communicate anthropological concepts and findings in speech and writing.
