

Global Health Studies, Minor

Requirements

The undergraduate minor in global health studies requires a minimum of 15 s.h., including 12 s.h. in courses completed at the University of Iowa. Students must maintain a grade-point average of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass. CLAS minors may only be earned concurrent with or subsequent to earning a University of Iowa bachelor's degree. They cannot be granted as standalone credentials or as the sole program of study completed at the University of Iowa.

The minor in global health studies is interdisciplinary and designed for students who wish to study the complex factors influencing health and disease locally and around the world. The minor equips students to apply interdisciplinary perspectives drawn from the social sciences and humanities to local and global health issues; analyze health and disease from biomedical, sociocultural, and environmental perspectives; understand how health issues affect domestic and international communities; and recognize the ethical challenges involved in interventions designed to improve health and health equity across cultural and geographical boundaries.

The minor in global health studies requires the following coursework.

Course #	Title	Hours
One of these:		
GHS:2000	Introduction to Global Health Studies	3
GHS:3850	Promoting Health Globally	3
One of these:
