

Biomedical Sciences

Chair, Department of Biology

- Tina L. Tootle

Director, Biomedical Sciences

- Jan S. Fassler (Biology)

Undergraduate major: biomedical sciences (BS)

Website: <https://biology.uiowa.edu/>

Biomedical sciences is an interdisciplinary major designed for students who plan to attend medical school or conduct biomedical research in graduate school and beyond.

The curriculum stretches broadly across scientific and mathematical fields. The major is selective, with a limited number of students admitted, and the curriculum is challenging, requiring dedication by its students, who are mentored by faculty members from the participating disciplines.

The departments of Biology and Chemistry (College of Liberal Arts and Sciences), and the departments of Biochemistry and Molecular Biology, and Microbiology and Immunology (Carver College of Medicine), collaborate to offer the major in biomedical sciences; the major is administered by the Department of Biology.
