	Hours	1
	Total Hours	72

a There is no standard curriculum for the PhD; work with faculty advisor to determine appropriate graduate coursework based on research interests. Coursework should include a range of seminars and courses offered by faculty in CSD or other departments (e.g., psychological and brain sciences, statistics, biology, neuroscience, linguistics).

- b Up to 33 s.h. of graduate-level transfer credits, taken as part of a graduate program, may be allowed upon approval.
- c Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
- d Graduate College program GPA is comprised of all courses that are approved degree requirements. If a student takes more than the minimum required number of semester hours to complete the degree, but all courses taken are eligible to count toward the degree, those courses will be included in the Graduate College program GPA.
- e Work with faculty advisor to determine appropriate coursework and sequence.

f Course number varies depending on which department offers the course; consult with the DGS to select a course that will satisfy this requirement.

g Dissertation defense.
