

Master of Computer Science, MCS

Career Advancement

Students pursue software design and development careers in the technology sector, including UX, mobile, and web development. Recent graduates hold positions at technology giants such as Microsoft, Google, Yahoo, or Intel, while others have taken positions in internationally established organizations whose primary business lies in the consulting, financial, health care, insurance, or media/entertainment sectors. A few MCS students enter the start-up market or pursue additional graduate education leading to the PhD at the University of Iowa or elsewhere.
