Master of Computer Science, M.C.S.

Requirements

The Master of Computer Science (M.C.S.) requires a minimum of 32 s.h. of graduate credit, including at least 24 s.h. earned at the University of Iowa. Students must maintain a cumulative g.p.a. of at least 2.75. Consult the Computer Science Graduate Handbook for detailed information about M.C.S. requirements and graduate study policies.

The Master of Computer Science requires the following coursework.

Theory

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

<tbody>
<tr>
<td>One of these:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CS:4330</td>
<td>Theory of Computation</td>
<td>3</td>
</tr>
<tr>
<td>CS:4350</td>
<td>Logic in Computer Science</td>
<td>3</td>
</tr>
<tr>
<td>CS:4980</td>
<td>Topics in Computer Science II (consult advisor for approved section topic)</td>
<td>3</td>
</tr>
<tr>
<td>CS:5340</td>
<td>Limits of Computation</td>
<td>3</td>
</tr>
<tr>
<td>CS:5350</td>
<td>Design and Analysis of Algorithms</td>
<td>3</td>
</tr>
<tr>
<td>CS:5360</td>
<td>Randomized Algorithms</td>
<td>3</td>
</tr>
<tr>
<td>CS:5370</td>
<td>Computational Geometry</td>
<td>3</td>
</tr>
<tr>
<td>CS:5850</td>
<td>Programming Language Foundations</td>
<td>3</td>
</tr>
<tr>
<td>CS:5860</td>
<td>Lambda Calculus and Applications</td>
<td>3</td>
</tr>
</tbody>
</table>

Algorithms

<tbody>
<tr>
<td>This course:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CS:4310</td>
<td>Design and Implementation of Algorithms</td>
<td>3</td>
</tr>
</tbody>
</table>

Colloquium

Students are graded on a satisfactory/unsatisfactory (S/U) basis. They must attend at least 80 percent of scheduled talks to earn a satisfactory grade in the course.

<td>This course:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CS:6000</td>
<td>Research Seminar: Colloquium Series (must enroll twice for 1 s.h. each)</td>
<td>2</td>
</tr>
</tbody>
</table>

Electives

Students complete their remaining 24 s.h. (eight additional courses) with a combination of computer science graduate courses, research and project courses, and non-computer science graduate courses approved by their advisor. The choice of electives must satisfy the following constraints:

- At least six courses (18 s.h.) must be classroom-based computer science graduate courses numbered 4300 or above, excluding CS:5110 Introduction to Informatics, CS:5990 Individualized Research or Programming Project, CS:6000 Research Seminar: Colloquium Series, CS:6990 Readings for Research, and CS:7990 Research for Dissertation.
- At most, one offering of CS:5990 Individualized Research or Programming Project. This course is an excellent option for students interested in exploring an area in computer science beyond that provided by computer science classroom-based courses. Students interested in pursuing a Ph.D. usually benefit from taking CS:5990.
- At most, two technical courses (approved by the advisor) that are not computer science graduate courses.

For students who want to take courses outside the department, those in mathematics, statistics, electrical engineering, industrial engineering, and management sciences are some popular options. Students also may include one computer science course taken during their first year in the M.C.S. program from these: CS:3620 Operating Systems, CS:3640 Introduction to Networks and Their Applications, or CS:3820 Programming Language Concepts.

Software Engineering Subprogram

The Department of Computer Science, with the Department of Electrical and Computer Engineering, offers a M.C.S. subprogram in software engineering. Students receive a software engineering subprogram designation on their transcript after they complete CS:5800 Fundamentals of Software Engineering, CS:5810 Formal Methods in Software Engineering, CS:5820 Software Engineering Languages and Tools, and CS:5830 Software Engineering Project, and earn their M.C.S. degree. Students should meet with the academic services coordinator to file the appropriate paperwork when they apply for degree, if they did not originally declare their intent to complete the software engineering subprogram.
