

# Earth and Environmental Sciences, BS

## Requirements

The Bachelor of Science with a major in earth and environmental sciences requires a minimum of 120 s.h., including 72–82 s.h. of work for the major, depending on the student's chosen track (earth and planetary science, environmental bioscience, or environmental geoscience). Students must maintain a grade-point average of at least 2.00 in all courses for the major and in all UI courses for the major. They must also complete the College of Liberal Arts and Sciences GE CLAS Core. Transfer students must complete a minimum of 15 s.h. of School of Earth, Environment, and Sustainability coursework in the major.

In planning coursework, students should be guided by the College of Liberal Arts and Sciences maximum hours rule: students earning a BS may apply a maximum of 56 s.h. earned in one department to the minimum 120 s.h. required for graduation, whether or not the coursework is accepted toward requirements for the major; students who earn more than 56 s.h. from one department may use the additional semester hours to satisfy requirements for the major (if the department accepts them), and the grades they earn become part of their grade-point average, but they cannot apply the additional semester hours to the minimum 120 s.h. required for graduation.

Students who are earning two majors from the same department (e.g. a BS in earth and environmental science and a BS in geographical and sustainability sciences), two degrees from the same department (e.g. a BS in earth and environmental science and a BA in environmental policy and planning), or a major and a minor from the same department (e.g. a BS in earth and environmental science and a minor in environmental policy and planning) may apply more than 56 s.h. from their home department toward their degree, but they must earn at least 56 s.h. of credit in courses outside their home department in order to graduate.

The BS with a major in earth and environmental sciences requires the following coursework.
