Geoscience, Ph.D.

A Ph.D. degree in geoscience is designed to bring students to the forefront of a specialized area of geoscience for future employment in higher education or in industry or government research.

Learning Outcomes
Graduates will demonstrate the ability to:

• develop broad knowledge in the field of geoscience and identify important research problems through development of subject matter expertise;
• develop a research framework including testable hypotheses, and conduct original independent research that contributes new knowledge to the field of study;
• effectively communicate research findings in both written and oral formats;
• conduct all aspects of research and teaching with the highest ethical standards; and
• be prepared for career options in academia, industry, government, or other relevant fields.
