

# Environmental Policy and Planning, B.A.

## Combined Programs

### **B.A./M.S. in Urban and Regional Planning**

Students majoring in environmental policy and planning who are interested in earning a master's degree in urban and regional planning may apply to the combined B.A./M.S. program offered by the College of Liberal Arts and Sciences and the School of Planning and Public Affairs. The program enables students to begin the study of urban and regional planning before they complete their bachelor's degree. Students are able to complete both degrees in less time than if they were to complete the two degrees separately.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information about the urban and regional planning program, see the M.S. in urban and regional planning in the Graduate College section of the Catalog.
