Global Health Studies, B.S.

The Bachelor of Science in global health studies is designed for students who desire to enter professional programs in the health sciences.

Learning Outcomes

The Global Health Studies Program equips its students to:

• identify the core areas of global health such as infectious and non-communicable diseases, maternal and child health, food sovereignty, environmental health, health inequalities, and interventions;

• analyze biomedical, social, cultural, and environmental determinants of health and disease;

• draw connections between significant health problems which affect both domestic and international communities; and

• recognize the ethical challenges involved in interventions designed to improve health and health equity across cultural and geographical boundaries.
