Exercise Science, BS

Combined Programs

BS/MS in Athletic Training
The Department of Health and Human Physiology (College of Liberal Arts and Sciences) and the Department of Orthopedics and Rehabilitation (Carver College of Medicine) offer a combined Bachelor of Science/Master of Science in athletic training. The combined degree program allows students to count a limited amount of credit toward both degrees, enabling them to begin the study of athletic training before they complete their bachelor’s degree. Coursework taken during the first three years on campus constitutes the required prerequisites for application to the master’s degree program.

Admission
Students apply to the MS program in their third year of undergraduate study. Admission to the MS program in athletic training is for summer entry. Students should consult their advisor about the appropriate sequence of courses and other requirements.

For more information, see the MS in athletic training in the Carver College of Medicine section of the catalog.
