

Health Studies, BA

Learning Outcomes

Students will be able to:

- understand the form and function of the human body at the organ and system levels;
- understand and communicate the major behavioral, clinical, social, economic, and environmental determinants of health and well-being;
- draw connections between major determinants of health and their influence on health and human diseases;
- identify and compare evidence-based health strategies to improve major determinants of health and well-being;
- apply knowledge to solve health problems using evidence-based health strategies; and
- critically evaluate evidence-based strategies targeted to specific health conditions.
