Health Studies, BA

Learning Outcomes
Students will be able to:

• understand the form and function of the human body at the organ and system levels;
• understand and communicate the major behavioral, clinical, social, economic, and environmental determinants of health and well-being;
• draw connections between major determinants of health and their influence on health and human diseases;
• identify and compare evidence-based health strategies to improve major determinants of health and well-being;
• apply knowledge to solve health problems using evidence-based health strategies; and
• critically evaluate evidence-based strategies targeted to specific health conditions.
