Health Studies, BA

Learning Outcomes

Students will be able to:

• gain a broad education in the health sciences;
• employ their fundamental knowledge of human physiology and health sciences;
• use and understand scientific methods to solve problems at the level needed in their chosen professional and/or graduate career fields;
• instill an understanding and appreciation of the relevance of healthy behaviors to a fulfilling and productive life; and
• engage in and encourage life-long learning in the rapidly evolving fields of physiology and the health sciences.
