Mathematics, BA

Academic Plans

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the university's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

Many mathematics courses must be taken in sequence, so students must begin major requirements as early as possible, and individual plans of study must be constructed carefully. The major typically requires 11 or 12 courses. Students must choose Program A, B, or C by the end of the third semester and must remain in their chosen program until they graduate in order to stay on track for the four-year graduation plan.

Before the third semester begins: coursework in the major through second-semester calculus.

Before the fifth semester begins: two or three more courses in the major.

Before the seventh semester begins: three or four more courses in the major and at least 90 s.h. earned toward the degree.

Before the eighth semester begins: two or three more courses in the major.

During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate.

Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Mathematics, BA

• Program A [p. 1]
• Program B [p. 2]

Program A

Course Title Hours

Any Semester
Program A is primarily for students who plan to work in business or government or to pursue graduate study in mathematics.

Students must earn at least 15 s.h. in post-calculus mathematics courses offered by the Department of Mathematics or cross-referenced with a mathematics course at the University of Iowa. Post-calculus courses are numbered 2000 or above, excluding: MATH:3700 Introduction to Matrix Theory, MATH:3996 Individual Study & Honors in Mathematics, MATH:3997 Readings in Mathematics, MATH:4010 Basic Analysis, and MATH:4020 Basic Abstract Algebra.

Major: required post-calculus math elective course g 3
GE CLAS Core: Natural Sciences with Lab d 4
g
GE CLAS Core: World Languages Third Level Proficiency or elective course i

Hours 15-16

Spring

Major: required post-calculus math elective course g 3
GE CLAS Core: Natural Sciences without Lab d 3
GE CLAS Core: World Languages Fourth Level Proficiency or elective course i
Elective course e, h 3
Elective course e, h 3

Hours 16-17

Fourth Year

Fall

Major: required upper-level math elective course i 3
GE CLAS Core: International and Global Issues d 3
Elective course e, h 3

Hours 16-17
Students may use elective courses to earn credit towards GE CLAS Core courses may be completed in any order. Enrollment in math courses requires completion of a math course is offered at most once per year; choose when to take higher than average number of semester hours per term, take summer classes, and/or extend graduation time frame beyond four years.

Admission to the Teacher Education Program, College of Education, is by competitive application. For information about application requirements, process, and deadlines, please consult an advisor for the College of Education.

GE CLAS Core: Sustainability a

Program B

Course Title Hours

Any Semester

Program B is intended for students seeking secondary school teaching licensure. Completion of mathematics (program B) BA, Teacher Education Program, and all general education requirements exceeds the minimum 120 s.h. required for graduation. Students should expect to take higher than average number of semester hours per term, take summer classes, and/or extend graduation time frame beyond four years.

Admission to the Teacher Education Program, College of Education, is by competitive application. For information about application requirements, process, and deadlines, please consult an advisor for the College of Education.

**Total Hours**: 130-137

---

- **a** Sustainability must be completed by choosing a course that has been approved for Sustainability AND for one of these General Education areas: Natural Sciences; Quantitative and Formal Reasoning; Social Sciences; Historical Perspectives; International and Global Issues; Literary, Visual, and Performing Arts; or Values and Culture.
- **b** Required for admission into the Teacher Education Program.
- **c** Enrollment in math courses requires completion of a placement exam.
- **d** Students who have completed four levels of a single language or two levels of two different languages in high school or college have satisfied the GE CLAS Core World Languages requirement. Students who have completed three levels of a single language may complete a fourth-level course in the same language or may choose an approved World Language and Cultural Exploration course. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course. Contact your academic advisor or CLAS Undergraduate Programs Office with questions concerning the World Languages requirement.
- **e** Complete the College of Education 10-hour pre-admission school field experience verification form available on the Teacher Education Program web page.
- **f** GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
- **g** Please see the College of Education website for detailed application instructions and deadlines. Admission is selective and a priority deadline exists.
- **h** Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
- **i** Students must complete MATH:4050, a fall-only course, or MATH:4060, a spring-only course.
- **j** Post-calculus courses are numbered 2000 or above, excluding: MATH:3700, MATH:3996, MATH:3997, MATH:4010, MATH:4020, and MATH:4120.
- **k** Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor or Degree Services.
