Mathematics is a basic tool for understanding modern society
as well as a crucial requirement for many careers in science,
gineering, business, and the professions. Research in this
living, dynamic subject is at the highest level in history.

An undergraduate degree in mathematics prepares students
for a variety of careers in government and business, for
secondary teaching, for graduate study, and with proper
planning, for a variety of professional programs. Graduate
study is advisable for some business and governmental
positions and for college and university teaching and
research. The department also offers a minor.
