

# Doctor of Nursing Practice, DNP

The Doctor of Nursing Practice (DNP) program is designed to prepare clinicians with the knowledge and skills to provide the highest standard of care for individuals, families, and communities and navigate today's complex health care systems. Nurse managers and administrators will gain the knowledge and skills necessary to develop, implement, and monitor programs of care and policies in complex organizations.

Programs designed to lead to professional licensure are subject to federal regulations regarding informational disclosures. Please see Professional Licensure Disclosures by Program for further information.

## Learning Outcomes

Graduates will be able to:

- utilize scientific underpinnings for nursing practice;
- demonstrate organizational and systems leadership;
- evaluate clinical scholarship and analytical methods for evidence-based practice;
- evaluate information systems and patient care technology for the improvement and transformation of health care;
- influence health care policy for advocacy in health care;
- collaborate interprofessionally to improve patient and population health outcomes;
- design clinical prevention and population health interventions; and
- demonstrate expertise in advanced nursing practice.

## Requirements

The Doctor of Nursing Practice (DNP) requires a minimum of 73 s.h. of graduate credit. Students may complete the program in three to five years, depending on their focus area. Students must maintain a UI cumulative grade-point average of at least 3.00.

DNP students complete basic graduate core courses, specialty courses, advanced core courses, and practicums. In didactic coursework, they explore clinical leadership, public policy and advocacy, specialty systems, change theory, finance and business, and entrepreneurial tools.

Those who enter the program with a master's degree must complete a minimum of 72 s.h., although some coursework from the master's degree program may count toward the DNP degree. Students who enter with a non-nursing master's degree who are interested in pursuing a focus in health administration can complete DNP degree requirements in health systems. Individuals who have been granted an MSN/APRN may complete the DNP with a minimum of 29 s.h. of graduate credit earned at the University of Iowa after DNP program admission and with a minimum of 43 s.h. of transfer credit previously earned from the UI or elsewhere.

Students must complete a minimum of 1,000 practice experience hours. Individuals who enter the program having completed an MSN may transfer approved clinical hours from their MSN program to the DNP program. The clinical hours requirement is evaluated for each student who has completed an MSN with a specialty program. Students who

completed more than 1,000 practice experience hours in an MSN advanced practice program still must complete the number of DNP practicum and project hours determined in consultation with their advisor and the DNP program director.

Students may choose from a number of specialties, including adult gerontology acute care nurse practitioner, adult gerontology primary care nurse practitioner, anesthesia nursing, family nurse practitioner, pediatric nurse practitioner—acute care, pediatric nurse practitioner—primary care, psychiatric/mental health nurse practitioner, and health systems. For yearly plans that detail coursework in these specialty areas, see the following section, "Plans of Study." Visit DNP Plans of Study on the College of Nursing website for a semester-by-semester view of required coursework for each DNP specialty.

A dual certification program is available that allows students to combine two of the nurse practitioner specialties (excluding anesthesia nursing). In addition, a combined program is available for BSN students with the nursing-RN subprogram who are interested in earning the DNP degree with an adult gerontology primary care nurse practitioner, health systems, or pediatric nurse practitioner—primary care subprogram.

Students must adhere to all Graduate College policies regarding academic standing, probation, dismissal, and transfer of graduate credit. Transfer credit applicable to the DNP is limited and must be approved by the DNP program director and the College of Nursing associate dean for graduate practice programs. Transcripts for individuals who have completed an MSN are evaluated individually.

## Admission

Applicants to College of Nursing graduate programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations on the Graduate College website.

Applicants must have a grade-point average (GPA) of at least 3.00; applicants for the dual certification programs must have a minimum GPA of at least 3.50. A criminal background check is required for all students upon admission. The College of Nursing has additional application requirements, as follows.

## Admission to the DNP Program

Application requirements specific to the DNP program are:

- a bachelor's or advanced degree with a major in nursing from a Commission on Collegiate Nursing Education (CCNE) or National League for Nursing Accrediting Commission (NLNAC) accredited nursing program;
- satisfaction of the legal requirements for the practice of nursing;
- current written recommendations from three persons knowledgeable about the applicant's competence in

the practice of nursing and potential for leadership and scholarship (forms required);

- a current résumé, goal statement (statement of purpose), statement of disclosure, and supplemental/information form;
- transcripts from all undergraduate and graduate coursework;
- DNP applicants to the direct care programs with master's degrees in nursing from other schools must provide verification of completed clinical hours from their institution's graduate director or must submit appropriate course syllabi;
- additional application requirements for post-APRN MSN to DNP applicants include providing verification of an MSN in a recognized ARNP specialty and proof of certification;
- an upper-level statistics course (undergraduate course at junior/senior level) completed within five years of application deadline except for post-APRN MSN to DNP applicants; acceptable University of Iowa courses are STAT:3510 Biostatistics, PSQF:4143 Introduction to Statistical Methods, STAT:4143 Introduction to Statistical Methods, or BIOS:4120 Introduction to Biostatistics (equivalent courses from other colleges also are accepted), and the upper-level statistics course must have a letter grade of C-minus or higher; and
- specific clinical experience requirements working as a registered nurse are required if applying to subprograms of adult gerontology acute care nurse practitioner, pediatric nurse practitioner-acute care, and anesthesia nursing. Visit DNP Admission Information FAQs on the College of Nursing website for specific work experience requirements.

For statistics courses taken at another institution, refer to that institution's catalog or registrar's office to verify course numbering scheme. Community college courses are not acceptable as an admission prerequisite statistics course. For further questions regarding the admission upper-level statistics course requirement, contact the College of Nursing graduate programs office.

Due to the level of web-based coursework required, international students in the DNP program of study are not eligible for F-1, F-2, or J-1 student immigration status. Questions regarding visas and immigration documentation should be directed to International Student and Scholar Services (ISSS).

## Application Deadlines

The application deadline for the DNP is Feb.1 for all subprograms except anesthesia nursing. The anesthesia nursing subprogram application deadline is June 1.

## Career Advancement

The DNP program prepares nurses for leadership and advanced practice roles within today's complex health care system. Graduates acquire the knowledge and skills to provide the highest standard of care for individuals, families, and communities.
