Master of Science in Nursing, M.S.N.

The College of Nursing offers the Master of Science in Nursing (M.S.N.) with three subprogram focus areas: entry into practice (effective spring 2023), clinical nurse leader (CNL), and nursing systems administration (NSA).

Learning Outcomes

Clinical Nurse Leader and Nursing Systems Administration

Graduates will be able to:

• lead change to improve quality outcomes;
• advance a culture of excellence through lifelong learning;
• build and lead collaborative interprofessional care teams;
• navigate and integrate care services across the health care system;
• design innovative nursing practices; and
• translate evidence into practice.

Entry into Practice

(Subprogram effective spring 2023)

Graduates will be able to:

• ensure delivery of safe quality nursing care to diverse individuals, families, groups, communities, and populations throughout the lifespan and across systems of care;
• integrate theoretical and scientific knowledge gained from natural and social sciences and culture, society, and the liberal arts into nursing;
• use leadership skills across systems of care to promote equitable, safe, and quality health care outcomes;
• use the best evidence from multiple ways of knowing to inform practice to make clinical judgements, solve problems, and address systems improvements;
• analyze how health care policy, regulation, technology, and economics impact nursing practice and the delivery of care;
• use effective interprofessional communication and collaboration strategies to promote quality health outcomes;
• apply health promotion and disease prevention strategies to diverse individuals, families, groups, communities, and populations to promote quality health outcomes;
• demonstrate professional values fundamental to the discipline of nursing; and
• apply evidence-based, person-centered care services across the health care continuum.
